UBC DEVELOPMENT FUND STANDS AT \$9 MILLION

VANCOUVER (CP) — The president of the University of B.C. said today that within the next year the university should be able to more than meet the provincial government's offer to match contributions up to \$10,000,000 for UBC development.

Dr. Norman MacKenzie, in his annual report, said the University Development Fund campaign in 1957 and 1958 was an "overwhelming success," and the fund now stands at more than \$9,000,000.

Island Mayor Bids to End Lumber Strike

The mayor of Courtenay, William Moore, is holding separate talks with both sides in the B.C. lumber strike today in an effort to reopen bargaining.

Labor Minister Lyle Wicks flew to Vancouver at noon and is expected to lend his support to Mayor Moore's mediation attempt.

There was speculation the government might be preparing to name a mediator of stature in the province to bring representatives of the IWA and the Forest Industrial Relations group to the bargaining table for the first time since the strike began July 6.

ENCOURAGING

Mayor Moore, former CCF MLA, went to Vancouver on Thursday to talk with representatives of the two sides.

"The separate meetings on Thursday were very encouraging," he said today. "They were both quite interested in the proposal."

The mayor's proposal is that both sides reopen talks with a mediating committee composed of himself and Mayors Pete Maffeo of Nanaimo and Loran Jordan of Port Alberni, two other Vancouver Island communities hard hit by the strike.

The strike now is in its sixth week. It has cost industry and workers millions of dollars in lost wages and production.

Mayor Moore explained his intervention by saying: "I came up with the plan simply to get both sides talking again, that's all."

"Mind you, it's a job for the provincial government, and Premier Bennett should be the third party. If the government is going to mediate, as it should, why wait until the province's economy suffers?"

HEAR BOTH SIDES

If his idea is accepted, he said, his three-mayor committee would hear both sides and then submit recommendations confidentially to each.

He said the other two mayors are willing to help.

The woodworkers are asking for 20 per cent more than their current \$1.72-an-hour rate.

KEENLYSIDE?

On the possibility of the government appointing a mediator, there is speculation Dr. Hugh Keenlyside, new chairman of the B.C. Power Commission, who is expected to return to Victoria August 24, will be chosen.

When questioned, Labor Minister Wicks would neither deny nor confirm the proposal.

Elsewhere on the strike scene Premier Bennett has been challenged to examine the books of two of B.C.'s largest IWA locals. The pressers—see page 13.

SHOAL BAY 'DIG' IS ON

A scientific team of archeologists—professional and amateur—is carrying out a "dig" at Shoal Bay, uncovering relics of the past and endeavoring to trace B.C. history, perhaps as far back as 5,000 years.

For today's progress report—and advice to would-be diggers—see page 13.

Reappraise NORAD Share U.K. Times Urges Canada

See Page 25

LONDON (CP) — The Times says Canada ought to reappraise her share in the air defence of North America to avoid "an agonizing conflict" between the continental and Atlantic interests.

The independent newspaper, commenting on United States requests for improvement in radar coverage of the Pine Tree line, says air defence is

a "touchy subject" in Canada since American unwillingness to buy the Avro Arrow aircraft resulted in its manufacture being stopped by the Canadian government.

"But the trouble goes deeper than this," The Times editorial continues. "Canada has always clung to her Commonwealth and European associations—she keeps a brigade group and an air division in

Germany at great cost—as a counterbalance to the inevitable pressures on her from the United States.

"The American idea of air defence is that cities, industry and populations must all be actively protected as well as the deterrent bases. To many Canadians this savors of a Fortress America policy and there is an understandable fear that if Canada continues to be sucked into the vastly expensive business of air defence her continental commitments will come into conflict with her Atlantic interests."

BANKS CLAMP DOWN

Business Boom Tightens Loans

OTTAWA (CP) — Canada's latest economic boom appears to be threatening to bust out of its monetary brackets.

The pressure—evidently resulting from strong demands for money with which to finance many and various new economic activities—tightened in two directions Thursday.

First, the Bank of Canada announced that its interest rate has stretched to a record 6.41 per cent. The rate's 43-per-cent increase from a week earlier was the biggest one-week stretch since it moved .45 per cent to 3.52 per cent last Dec. 10.

Following this announcement, the Canadian Bankers' Association announced the banks would have to "curtail further expansion in their lending policies."

Harold W. Thomson, president of the association, said in a press statement:

"The banks most regretfully are deprived of the flexibility necessary to make new loans in particular and, in a general way, to provide for increases in the amounts already borrowed under existing credits."

NO NEW LOANS

In simpler language, the bankers seemed to be saying they won't be making any new loans or expanding existing ones while this state of monetary affairs exists.

Since one reason for the present high interest rates is an apparent reluctance by both the government and the Bank of Canada to engineer any sharp increase in the country's money supply, the statement seemed to some observers a move to put pressure on federal monetary manipulators to loosen up.

The apparent reluctance by the government and central bank substantially to increase the money supply—although it has risen by some \$400,000,000.

CONTRACTS TO AVRO, CANADAIR

OTTAWA (UPI) — A. V. Roe Company will build the engine and Canadair Company will build the airframes for the \$350,000,000 order of Lockheed F104G Starfighter jet planes for the Canadian NATO air division in Western Europe, Defence Production Minister Raymond O'Hurley announced today.

* * *

OTTAWA (CP) — Prime Minister Diefenbaker told reporters today after a cabinet meeting he had no further news on the question of whether Canada would invite Soviet Premier Khrushchev to visit this country in conjunction with his forthcoming tour of the United States.

He also said he had no information about a prospective cabinet shuffle. He indicated there would be nothing on this until at least next week.

COMMITTED

Charged with fatally shooting Det. Sgt. Raymond Purdy while resisting arrest, Guenter Fritz Podola was committed for trial at London's Old Bailey on Sept. 8 when he appeared in magistrate's court today. The case against the 30-year-old German, who went to Britain from Canada, was heard in secret.

Dominican Chief Directly Blamed

HAVANA (UPI) — The government announced today it had smashed an airborne invasion from the Dominican Republic in central Cuba. It said the fighting was led personally by Premier Fidel Castro.

The announcement said the final blow to the attempted invasion came Thursday night when the Castro-led forces captured a Dominican C-46 transport plane which had flown in with another shipment of arms and munitions for the invading forces.

Four men were killed in the fight for the plane outside the city of Trinidad—two counter-revolutionaries and two members of the government forces.

The plane was reportedly piloted by former Cuban Lt.-Col. Antonio Soto. Soto and

Total Fighting Probably 5 Minutes

When they attempted to shoot their way out of encirclement, government troops under Castro's direct command returned fire, it was said. The entire clash probably lasted no more than five minutes.

The plane was a standard C-46, known in the Second World War as a Curtis Commando. Its only markings was the United States style registration number N18586 on the vertical stabilizer.

Trinidad is in Las Villas Province where Premier Fidel Castro personally has been directing government troops against a counter-revolutionary movement. The plane apparently was bringing in more leaders of the anti-Castro movement.

Castro and a number of his lieutenants were directly involved in capturing the plane and breaking up a plot against the government, the announcement said.

The plane was identified as Luis Pozo Jimenez, a Spanish mercenary of the Trujillo foreign legion.

The announcement said Cuban government Lt. Elipe Perez and a civilian, Frank Hidalgo Cato, also were killed and that six government men were injured in the exchange of fire with the invaders.

Cuban authorities said the Dominican plane was carrying large quantities of arms and munitions. They also said the government had captured several other such shipments of arms during recent days in defeating the invasion force.

Castro and a number of his lieutenants were directly involved in capturing the plane and breaking up a plot against the government, the announcement said.

Report to Nation Planned Tonight

The government said Castro had been on the scene for two days and would report to the nation tonight. This presumably would be the nationwide radio-television speech first expected last Saturday when Castro was reported ready to announce defeat of an anti-government plot.

The government announcement blamed the invasion attempt squarely on Generalissimo Rafael Trujillo, strong man of the Dominican Republic.

The government announcement broke five days of silence on the fighting in the mountains of central Cuba.

The government silence had begun slowing down Cuban business.

Faubus Threatens National Guard Call

LITTLE ROCK, Ark. (AP) — Orval E. Faubus today said he is ready to call on the state police and National Guard.

Faubus Thursday night was accused by Mrs. Daisy Bates, state president of the National Association for the Advancement of Colored People, with using the state police to try to intimidate the NAACP forces.

Mrs. Bates sent a telegram to President Eisenhower saying her plea for protection had been ignored by local authorities and that friends who had guarded her had been arrested.

Faubus did not say under what circumstances he would

LAOS REDS DEFECT

VIENTIANE, Laos (Reuters) — More than 100 pro-Communist soldiers defected Saturday from the Royal Laotian Army, authoritative sources said here today.

Work Accident Rate Lowest Since 1950

The injury and death rates of British Columbia industry were greatly reduced during 1958, annual report of Workmen's Compensation Board revealed today.

There were 75,039 injuries reported, a decrease of 14.9 per cent from the previous year and the lowest recorded total since 1950.

Deaths were reduced from 240 in 1957 to 208 in 1958, also a decrease of 13.3 per cent, also the lowest total since 1950 when 205 persons died in industrial accidents.

The WCB paid out \$20,100,000 in compensation—20.1 per cent for medical benefits, 37.2 per cent for time loss, compensation and 42.7 per cent for permanent disability and death awards. The total outlay was reduced slightly from the two previous years.

A breakdown of the accident ratio among various industries shows forest products highest with 23.9 per cent, con-

MAYOR

Continued from Page 1
mier earlier said the unions should open their accounts in view of letters he had received from strikers' wives who charged strike pay was being withheld unless their husbands begged for it.

Syd Thompson, president of the 6,000-member Vancouver local, said the premier is "welcome any day of the week to have a look at our books."

In a telephone interview, Walter Allen, president of the 4,000-member Alberni local, said: "If the premier has the guts to come up here, we'll have the guts to show them to him."

Premier Bennett said today he doesn't wish to examine the strike-fund books of the IWA but thinks the union should say "how much they give each person and the order in which they're giving it."

WHY SO TOUCHY?

"I wonder why they're so touchy about it," the premier said here in an interview today following several outbursts by IWA leaders who invited Mr. Bennett to have a personal look at the books.

The IWA, with 25,000 coastal workers on strike demanding a 20-percent boost over the present \$1.72 hourly base rate, does not provide strike pay, only strike relief.

To get this money a man must show need—which unionists say means he is supposed to have no other income and no socks full of money cashed away.

This was policy laid down by the IWA convention last February.

Each union local has a strike relief fund committee which takes requests and decides whether they should be met. Strikers turned down can appeal to local officials.

Relief payments are \$14 weekly for a married man with \$3 for each child while a single man gets \$8.

WIRE BRIEFS**Desperate Bid Fails**

MONTREAL (CP) — Deported Yugoslav stowaway Mate Akrap, 29, jumped from a Danish freighter into the St. Lawrence River near Trois-Rivières, Que. Thursday in a last desperate bid to remain in Canada.

After swimming to shore, he was captured by a Quebec provincial police officer, taken to Father Point, Que., and put back aboard the Olav Bjarke when the ship picked up a pilot.

Titan Blows on Pad

CAPE CANAVERAL, Fla. (AP) — A giant Titan missile exploded on its launching pad today as it lifted off on its first full-powered test flight.

Slayer Reprieved

OTTAWA (CP) — The cabinet has commuted to life imprisonment the death sentence imposed on 19-year-old André Chapleau, Montreal, for the murder by stabbing of a Montreal restaurant owner, Joseph Alphonse Tremblay, 71.

These fangers stay free from unightly warts, after using

struction industry 21.8, trade and service industries 15.1 and manufacturing 11.8.

By industrial groups, the greatest decrease was in the construction industry with a drop of 34 per cent from the previous year.

BUSINESS

Continued from Page 1
since last May — stems from concern that any such move would prove inflationary. It might only pave the way for another economic slump a few months hence.

The dream of monetary and economic planners is to be able, by proper planning and controls, to stretch boom times out into a steady flow of prosperity.

BANKS' RATE UP

The bankers' statement drew attention to the fact the Bank of Canada's minimum rate of lending to the chartered banks is now above the legal 6 per cent maximum at which they may lend.

Hence, said the bankers, "the interest rate levels can no longer operate as a deterrent to increasing loans."

In other words, even present record interest rates are not deterring Canadians who want money from borrowing if they can.

"These figures," the bankers' statement then added, "record dramatically the sharp increase in the demand for money in comparison with the available supply."

The Bank of Canada interest rate is fixed at one-quarter of one per cent above the average yield of 91-day treasury bills the government sells weekly through sealed-bid tenders—6.16 per cent Thursday for \$115,000,000 worth.

While each chartered bank would set its lending policy according to its own capacity, banking spokesmen said, the general effect was that bank loans would be harder to obtain.

A. T. Lambert, vice-president and general manager of the Toronto-Dominion Bank, said there "seems to be a collision between demand and supply."

He said he expects the "overall total of loans will remain level" and "each institution will operate within its own means." All the demand for loans will not be met, he said.

Mr. Lambert said the loan cutback has been caused by "too many people trying to do too many things."

There has been a large amount of capital construction, home building and highway construction. He said "some part of some of these will perhaps have to be deferred until next spring."

HAVE LESS TO SPEND

The fact the government has lately had to pay a steadily increasing rate to dispose of them indicates that banks and financial houses have less and less to spend on short-term investment.

This in turn is considered an indication that demands for loans in an expanding economy have been rising.

Chartered bank loans rose sharply to \$5,058,000,000 at Aug. 5, up \$879,000,000 from a year earlier and \$19,000,000 over the previous week. The ratio of banks' cash reserves to deposits was 7.9 per cent, just 1 per cent below the Bank Act requirement of an eight-per-cent ratio.

The money supply at Aug. 5 stood at \$13,403,000,000, up \$30,000,000 from July 29. Since last May it has risen from about \$13,000,000,000—the level at which it held from October of last year.

OUR VIVI A CLOSE SECOND**City Miss Just Misses Miss Canada Top Prize**

Miss Victoria, shapely, 19-year-old Vivi Petersen, just missed being chosen Miss Canada of 1960 but she's very happy at taking second place.

So are her parents, Mr. and Mrs. Volmer Petersen, 2815 Fifth, and officials of Victoria Junior Chamber of Commerce who sponsored her entry in the annual Miss Canada pageant at Burlington, Ont.

Miss Victoria will return here Saturday night carrying the cup she won as runner-up to Rosemary Catherine Keenan, 23, Rothesay, N.B., the new Miss Canada.

Both girls topped the poll for beauty, personality, talent and deportment in the competition between 23 lovelies from all parts of Canada.

Vivi sang, "I Whistle a Happy Tune" from the show "The King and I." She was nervous but received a big hand.

"I am very happy to have won this cup and I want to show it to everyone in Victoria," she said speaking by phone from Burlington.

Of Miss Keenan, the winner, she said:

"It couldn't have happened to a nicer girl. She deserved to win. Next year I hope whoever represents Victoria will win the big cup."

Plans Airline Career

Vivi, who came here with her family from Denmark four years ago, will return to Victoria High School for another year. Then she hopes to become an airline stewardess.

To this end she has taken training in first aid with St. John Ambulance Association in Victoria. She will be 20 on March 10 next year.

"We are all very proud of her," her father, a Victoria electrician, said today. "She is a lovely girl, quite unspoiled, and in four years she has

learned to speak English as well as anyone.

"Naturally we hoped she would be Miss Canada but we knew she did her best and that is what matters most. She is a generous-minded girl and would never be jealous of anyone who got ahead of her."

Mrs. Petersen, who runs a roadside cafe at 305 Island Highway, 1600, a philosophic view.

"If Vivi had been made Miss

Canada she would not have been able to return to high school—and it is better that she finish her schooling."

Victoria High Cheerleader

Vivi is a cheerleader at Victoria High and is said to be a good mathematics student. She plans to become a Canadian citizen after five years in Canada.

Peter Forward, president of Victoria Junior Chamber of Commerce, wired congratulations to her Thursday night.

"She is a great credit to the city and it is evident we picked a winner when we made her Miss Victoria at the Jaycees Fair last May."

Pipeline Hearing Oct. 15

CALGARY (CP) — The Alberta and Southern Natural Gas Company said today it has been informed the United States Federal Power Commission has set Oct. 15 as the date it will begin hearings on a 1,400-mile British Columbia-to-California pipeline project.

The \$30,000,000 project is planned by Pacific Gas Transmission Company, a subsidiary of Pacific Gas and Electric Company of San Francisco. Alberta and Southern, also a PG and E subsidiary, is an export company which hopes to feed Alberta natural gas into the pipeline system.

Permission to export 400,000,000 cubic feet of gas a day during the next 20 years has been granted Alberta and Southern by the Alberta government but awaits the approval of the Canadian federal government. It is expected the newly-appointed National Energy Board will deal with the application this fall.

New Typhoon Lashes Japan

67 Known Dead, Hundreds Injured; Railways Blocked by Floods, Slides

TOKYO (UPI) — The second typhoon in a week lashed Japan today with torrential rains and winds up to 135 m.p.h., leaving 407 persons dead, injured or missing and driving 60,000 families from their homes.

By mid-afternoon, the storm had crossed central Japan and howled out to sea, but weathermen feared it might veer eastward later and hit the north coast.

The typhoon bypassed the Tokyo-Yokohama area, and so far as was known there were no American casualties.

Unofficial reports listed 67 known dead, 77 missing and 263 injured by the howling storm, which dumped as much as 30 inches of rain on the mountains of central Japan.

Floods swept much of central Japan, and Rivers in other places were reported rising toward flood stage.

The typhoon inflicted the worst damage in history on Japan's rail lines, which were blocked at 82 points by floods or landslides.

Nirasaki, one of the hardest hit communities in the country, was lashed by 135-mph winds and battered by the floodwaters of the Kamanashi River.

Air Force Lt.-Gen. Robert W. Burns, U.S. Supreme Commander in Japan, proclaimed

Pearson Off For Holidays In Brittany

LONDON (CP) — Liberal Leader Pearson and Mrs. Pearson leave London for France today to spend a week relaxing on a Brittany beach.

They arrived from Canada Aug. 3 and spent the first week in Oxford, where Pearson addressed an international teachers conference. Since then they have been visiting friends in London.

"This is really the first time since I was a cabinet member that I have had a chance to visit London," he said. "And we are having a wonderful time."

They will meet their son, Geoffrey, his wife and four children in Brittany. They are on vacation from Paris where Geoffrey is attached to NATO.

The Pearsons will fly to Dublin later for a few days and return home by air Sept. 3.

Agreement At Last

IF THE RELIABLE CANADIAN PRESS is right in reporting that Canada and the United States have virtually reached agreement on the Columbia power dispute the economic prospects of British Columbia have been vastly improved. Such an agreement would assure this province an abundant supply of cheap electricity for many years to come.

According to the Canadian Press, the International Joint Commission, representing Canada and the United States, has accepted the original Canadian formula on the Columbia—an equal division of the new power created in American turbines south of the border by a Canadian dam north of the border. Canada has always demanded half of these so-called downstream benefits, and the United States has always objected. If the International Joint Commission has finally approved the Canadian formula it cannot bind the two national governments but, as in all former cases of this sort, they are likely to approve the Commission's recommendation.

If the big hurdle has been surmounted at last British Columbia will supply its increasing power needs, for a good many years ahead, from American electrical plants, at a low rate of something like three mills in Vancouver, as forecast by the Canadian Government. At first we shall not need all of our share of the downstream benefits but we can take an increasing annual volume as we require it, until that share is exhausted. Then we can install turbines at the Canadian dams north of the border and make new supplies for ourselves.

From downstream and upstream we should derive sufficient power, at relatively low cost, for a considerable period, its length depending, of course, on our rate of economic

growth. But certainly if the Columbia is to be harnessed without any long delay we are unlikely to need Peace River power in the immediate future—power admittedly more expensive than that obtainable from the downstream Columbia benefits.

The Peace River promotion has been based primarily on the assumption that international disagreement would stall the Columbia scheme indefinitely and expose British Columbia to a disastrous power shortage within some ten years, or less. If that assumption is wrong, if the Columbia scheme is going ahead, it is difficult to understand why investors would risk huge sums on the Peace when they must sell their power in competition with the cheaper power of the Columbia.

Mr. Bennett argues that the Peace and Columbia schemes are required simultaneously, since British Columbia can soon use all the power from both rivers. A projection of our future power use, even on the most optimistic forecast of our economic growth, does not support that assumption. Undoubtedly we shall need both rivers, and others, later on but the Canadian Government is undoubtedly right in believing that the Columbia should be harnessed first because it offers the cheapest power available in America, perhaps in the world.

Ottawa has been struggling for the last several years to prevent the Peace promotion from forestalling the development of the Columbia and, if the Canadian Press is right about the International Joint Commission's agreement, Ottawa's policy apparently has succeeded. In the race between the two rivers the Columbia seems to have won.

Where all this leaves the Werner-Gren promotion and Mr. Bennett's political strategy, largely based on it, remains to be seen.

Baring the Facts

EVEN THE FEW BRIEFS so far heard in the survey of mental health requirements and facilities in this province leave no doubt of the urgent need for an early and far-seeing program.

The report of Dr. Mathew Ross, medical director of the American Psychiatric Association, who is conducting the survey at the request of the Provincial Government, will not be presented until this time next year. But long before then the shape of the required plan will be evident, and some preliminary efforts should have been made.

It is obvious that care of the mentally ill in British Columbia has been seriously neglected. The facilities available cannot begin to cope with the demand, while in many fields—such as psychiatric advisers at Brannan Lake, residences for

emotionally disturbed children, and other problems—the province has so far done practically nothing at all.

Main briefs at the Victoria sittings held by Dr. Ross were presented by experts in close touch with the need and the little that is being done. When all these facts have been properly assembled and evaluated, the Government will be faced with a demand for action that cannot be denied. It is to be hoped that the Government, and the public at large, will be able to recognize the responsibility, and be prepared to pay for what must be done.

Much has been achieved in combating physical illnesses and diseases. The problem of what to do about one of the most prevalent disablements arising from our modern civilization—mental illness in all its different forms—shortly must be met head-on.

The Precious Water

WHILE MR. BENNETT IS worried because Canadians use too much liquor (thus providing his and other governments with revenue) there is another problem to be considered. Canada seems likely to use more water than it can produce from its present prodigal methods.

A speaker at the recent international convention of the American Water Works Association remarked that "people don't worry about water until the tap runs dry." If we are not careful, the tap will run dry in many parts of America not so long from now.

For example, farm wells have been going dry in southern Ontario, The Financial Post reports. Streams have suddenly disappeared. Cities like London have been forced to drill deeper again and again to reach underground water. Few large centres in Saskatchewan have ever enjoyed an abundance of good water and in some western areas

"A great many rapidly-expanding municipalities," The Post says, "are worried now; they can't keep growing unless they get more water. Yet in 15 years at the present rate of growth and consumption we will need twice as much water as we are using now. The problem, as water-short southern California has long discovered, is not going to be solved overnight. It's going to take long-range planning and far more and wider co-operation among municipal and provincial authorities."

Like the top-soil on which man mainly lives, the water table of North America generally is falling as man extracts the moisture of the earth. A growing population will need more and more water as time goes on but we have not yet done nearly enough, by damming rivers, conserving lakes and protecting the great reservoirs of the continent, to keep our grandchildren amply supplied with one of life's first essentials.

Still Looking Forward

WITH SOME 500 VISITORS arriving in Kitimat later this month, that community will take on some of the bustle and activity which are its rightful heritage. The slump in the aluminum market, which closed down some existing potlines and postponed the scheduled construction of more, is slowly being overcome. With a return to peak production Kitimat will recover the several hundred citizens it lost last year and resume the march toward its planned future of up to 50,000 inhabitants.

Barron, Victoria Daily Times.

DIGGING INTO OUR RUINS

Will They Be Able To Read Our Story?

THE current plan to delve into an Indian midden at Shoal Bay and try to learn a little more about the folk who preceded us in this part of the world is an excellent one. As

Mr. Wilson Duff says, it's like reading a book to dig into history in this way, but the book can be read only once for the pages are destroyed as the digging proceeds. And even what is found may not be easily translated. A chip of rock here, a

Tobin

bit of cooking-fish ash there, a fragment of bone nearby—these are the words and sentences of the buried volume, and only a trained eye can determine their significance.

It is interesting that simultaneously with Mr. Duff's announcement came word of a find of fossils near Kamloops which may date back as much as 30 million years. The record of the rocks shows traces of the imprint of a fish tail, a few leaves and other remains. The Shoal Bay pages won't turn that far back but they should produce some interesting material.

Exhibit 'A'

Whenever I see a reference to such archaeological discoveries I wonder what sort of a record we're leaving today for diggers far in the future to discover. It may well be that the things we fondly expect to be our witness in that far-distant day will not turn up at all.

The first form of record that comes to mind when we think of our message to posterity concerns such things as museums, libraries, and other exhibits. We use them to delve into the past, so we think of them as destined to explain

the present to the future. But it might not work out that way at all.

Some of the evidence we are most anxious to leave for our descendants may not last long enough. Libraries may be burned down or blown up. Paper decays despite the best of care.

The Dead Sea Scrolls lasted on parchment, although in a pretty badly deteriorated state, but most of our letters from the past were written on clay or stone. There isn't much contemporary writing done on clay or stone.

Our metal civilization, so durable-looking at the moment, is doomed under time's long-range schedule. Rust will take care of that.

Little Survives

Very little of the written information of today, in fact, is likely to survive the centuries. And certainly, when you get into numbering the years by thousands, our hand-me-downs are obviously going to be in the form of objects rather than misses.

Once you get into that field, the chances of a coherent message become much less. Archives are run by nature on a very hit-or-miss basis.

A fragment of pottery, a spear head, a piece of carved basalt, a scratch on a cave wall, a charred bit of bone—these are the treasures which nature singles out as worthy of preservation. It is from such things as these that we have learned much of what we know about our forebears, although, of course, such finds as Egyptian tombs provide a much more detailed picture of particular times and places.

Even without a nuclear war, there isn't going to be much of our environment left to look at, say, 20,000 years from now. And in 50,000 or 100,000

years the searchers will be lucky to find a trace of us.

Imagine the scene, thousands of years from now, as experts gather in the Vale of O-kah-nah-g'n to examine the bare ground left in the rear of a retreating glacier—the nineteenth ice age being in its closing stages.

The party stoops to peer at a sprinkling of whitish ash that lies in a rough circle on the earth. The chief expert gives his opinion.

"Here, obviously," he says, "is evidence of a sacrificial fire set by some primitive tribe. Probably they gave thanks to some savage tribal deity for lifting crushing burdens from their shoulders. Observe the lightness of the ash, denoting that some flimsy material was consumed in the flames; note its bleached appearance, probably indicating that it settled down through water after the fire; take notice of this well-shaped arrow head, scorched by the flames but not badly burned, as though it had merely passed near them.

Lowly Origin

These pitiful symbols of a vanished race serve to show us how plunged in ignorance they were, how swayed by superstitious fears, how anxious they were to free themselves from a fancied load or debt to nature, as it were, but struggling in vain to do so. It seems inconceivable that from such debased conditions our own race could have arisen.

"Let us set this place aside to remind us of the follies of mankind in its early, formative stages, and resolve never to let ourselves fall into such errors, I have spoken."

Then the party would move off, with many a pitying backward glance—such a glance, indeed, as may be seen in an occasional eye today.

Death Awaits

Admittedly, Mr. Miller comes from the notoriously depressed area of Bell County, where one old man had told him that "death awaits anyone of us who falls ill"—this on account of the high cost of medical attention.

But the Soviet editor, still keeping his own views and comments out of the paper lest he should be suspected of bias, adds the informative footnote that Senator Douglas had recently presented to the United States Senate a map on which 40 per cent of the areas marked had a low standard of living.

If any Soviet reader wishes to understand this as meaning that Mr. Miller's description applies to 40 per cent of the United States he is free to do so.

And if anyone were to doubt that this picture of America is accurate, the Soviet papers will probably be able to give chapter and verse for every fact they quote. For whatever else they do, Soviet newspapermen do not lie; the ethics of their profession would not allow it.

By Special Arrangement With The Manchester Guardian

FROM WASHINGTON

Washington-Moscow Visits: Where Peace Will Be Decided

WHEN the President goes to Europe he will talk separately to our three principal allies, first with Dr. Adenauer, then with Mr. Macmillan, and then with Gen. de Gaulle. There is, it seems, to be no common meeting of the four Western heads of government.

The separate meetings which Gen. de Gaulle has insisted upon, are supposed to make it clear to the world that when President Eisenhower talks with Chairman Khrushchev, he is not the authorized negotiator of the Western world.

Although it may look as if this weakens the President's position, in fact

it will strengthen it. In no circumstances could the President wish to make a private deal with Mr. K. affecting the interests of any of our allies. They will all have to be consulted and each will have to give his consent to any agreement.

But just because the President has no official collective mandate from the allies, he will be free to explore without embarrassment all the possibilities of co-existence. It will not be like Geneva, where nobody on either side was free to manoeuvre, much less to negotiate.

There is no great mystery about the significance of the Eisenhower-Khrushchev visits. They are a recognition of the fundamental fact of the world today that the issue of peace or war will be decided in Moscow and in Washington.

Only the U.S.S.R. and U.S.A. can

wage a nuclear war, and they alone, therefore, can make the ultimate decisions which mean peace or war. They cannot delegate to their allies the ultimate decision and, whatever the appearances they maintain, this underlying reality will prevail.

These are the facts of life in the middle of the 20th century. Because of them, whenever the cold war reaches a point of irreconcilable conflict, the two powers have to find a way around it.

That is what they did at Geneva in 1955, when nothing was settled except that for four years there was in fact a standstill about Germany. That, presumably, is what they will do once again in 1959. Most probably no legal settlement will be agreed to. But a way may well be found to avoid a showdown over Berlin.

If a way is found, it will be because Moscow and Washington have decided that they do not intend to have a world war about Berlin.

In this connection, there is a misunderstanding abroad which, in the interest of general political hygiene, must be cleared up. It is that the British and Americans, now that their policies have converged, are less resolute and courageous in facing war with the Russians than are Germany and France.

Sheer Nonsense

This is such sheer nonsense that if it were not frequently insinuated, it might be politely ignored. The truth is that France and Germany are for all practical purposes disarmed in Europe, and separately or jointly they are quite unable even to contemplate a war with Russia.

The real difference within our Western alliance is that Dr. Adenauer and Gen. de Gaulle think that Mr. K. is bluffing about Berlin. Britain does not think he is bluffing, and neither does the United States. It does not seem likely to us that Mr. K. would abandon his campaign about Western Berlin just because we called his bluff by refusing to negotiate with him.

He would be bound to do something and, unfortunately, he is able to do quite a lot. He is able to give the officials of the East German Communists

WALTER LIPPmann

FROM LONDON:

Through Soviet Eyes

ALTHOUGH Mr. Nixon could not speak to many Russians, and although only a few others could visit the American exhibition in Moscow, the Soviet press has done its best to assure any sense of deprivation the rest may have felt.

Never before has the Soviet press devoted more space and attention to the United States, its people, and its way of life than in the past fortnight. If the composite picture that results is a rather overwhelming one, this must be due to the single-mindedness and seriousness of purpose with which Soviet editors approach all their tasks.

Indeed, they have not shirked from going as far afield as Italy for evidence that children there were being sold wholesale for transportation to the United States. They have found that in the southern regions of Italy 1,200 children have been sold in this way in the past year at prices ranging from \$1,000 to \$1,500.

And what happens to American children when they are old enough to go to school?

Startling 'Statistics'

Newspaper readers all over the world will remember the school fire in Chicago last December, in which 90 children and teachers lost their lives. What they will not know, unless they have been reading Russian papers in the past few weeks, is that an average of 2,100 schools go up in smoke annually in the United States.

Nor, in its scrupulous regard-for-the truth, did "Komsomolskaya Pravda" say that these fires were smaller or less costly in terms of lives than in Chicago. It simply put these two items of information side by side, and allowed its readers to draw their own conclusion they liked. Clearly, some children survived the holocaust.

But only to face a fate worse than death. The "Daily Mail" is quoted for the news that "in the past week in New York there have been cases of knifing, of knuckledusters being used and of rape in the classrooms and school corridors." The situation had become so dangerous that parents keep their children at home and boycott the schools.

Not all parents, apparently. Mr. Miller, from Kentucky, is said to have written to his senator that secondary school pupils have as "their only source of funds for their education the hospital in Knoxville, where they sell their blood."

Death Awaits

Admittedly, Mr. Miller comes from the notoriously depressed area of Bell County, where one old man had told him that "death awaits anyone of us who falls ill"—this on account of the high cost of medical attention.

But the Soviet editor, still keeping his own views and comments out of the paper lest he should be suspected of bias, adds the informative footnote that Senator Douglas had recently presented to the United States Senate a map on which 40 per cent of the areas marked had a low standard of living.

ACROSS THE PROVINCE

Water Shortage Solution Seen

(Times News Services)

PENTICTON—An effective solution to Penticton's water problem now is in sight. Mayor C. E. Oliver feels, with completion of an access road to the Boulder Creek area and a potential new dam site.

The seven-mile access road was completed early this week and the mayor headed a party of aldermen, city officials and newspapermen on a tour of the area Thursday.

Mayor Oliver, who saw the potential dam site Tuesday, said it "has all the earmarks for a first-class dam—best the city has ever built."

ARSON SUSPECTED

LUMBY—RCMP are following up reports that an arsonist may have been responsible for a tent fire that killed a seven-year-old girl here.

The girl, Victoria Hull, was burned over 75 per cent of her body on July 18 when a backyard tent caught fire. She died in a Vancouver hospital several days later.

RCMP had an inquest adjourned until they could complete their investigation of the fire. The inquest will be held on Aug. 28.

SPEEDBOATERS FINED

GIBSONS—Fined \$100 each and ordered off the water for 60 days were James Musgrave of Vancouver and Harold Fern, Jr., of Gibsons. They were charged with operating pleasure boats in a hazardous manner.

TOT DIES IN FIRE

HAZELTON, B.C.—Fifteen-month-old Long Douglas Staub, son of Mr. and Mrs. Edward Staub, died when fire destroyed the family's cabin 30 miles north of here.

Three-month-old Dawn Staub, the dead boy's sister, was saved by her grandfather, R. T. Bennett, who reached through a window and pulled her from her crib.

MRS. FAIRCLOUGH BUSY

KELOWNA—A busy schedule has been arranged for Immigration Minister Fairclough when she makes a one-day visit to inspect Indian reserves throughout the Okanagan Valley.

Mrs. Fairclough will be met at Salmon Arm Sunday by Stewart Fleming, Member of Parliament for Okanagan-Revoltok. Her first stop will be Enderby, where she will meet representatives of the Enderby Reserve.

UNION PROBE ASKED

KYUQUOT, B.C.—Formation of a committee to press for an investigation of the United Fishermen and Allied Workers Union (Ind.) was reported Thursday at this Vancouver Island fishing community.

A spokesman for the committee said it had been formed to seek an investigation of the "aims, methods and general activities" of the union.

Aluminum Rolling Mill Needed in B.C.

The need for an aluminum rolling mill in British Columbia was outlined by Trade Minister Robert Bonner Thursday.

He said aluminum production and use in the province is now so great an aluminum rolling mill to service the Western Canada market may be a possibility in the not too distant future."

The trade minister was commenting on a new report published by his department, "The Fabricating and Consumption of Aluminum Products in British Columbia."

It reveals that besides Kitimat production facilities, there are 150 plants in B.C. manufacturing aluminum products. They consume 12,000,000 pounds annually, but all rolled stock comes from the East or abroad.

India Communists Set Protest Boycott

NEW DELHI (Reuters)—Communist members of India's Parliament decided today to boycott all official functions Saturday, when India celebrates the 12th anniversary of her independence, in protest against the dismissal of the Communist government in Kerala state by the central government.

GAS TAX HIKE

WASHINGTON (AP)—The House of Representatives ways and means committee voted Thursday to raise the federal gasoline tax another penny, to four cents a gallon. The extra money would go to keep the 41,000-mile interstate highway construction program close to schedule.

WASHINGTON (AP)—The House of Representatives handed President Eisenhower a smashing victory Thursday by approving a bill he said is needed to end corruption in labor unions.

✓

The roll-call vote of 229 to 201 was a stinging defeat for House Democratic leaders and leaders of organized labor who had fought for a much milder

anti-racketeering bill.

Eisenhower, taking his campaign to the people in a radio-TV speech last week, had said the Democratic bill wouldn't do the job of ending union abuses.

The House put off until today a formal vote on final passage of its bill, but that appeared a foregone conclusion.

A coalition of 134 Republicans and 95 Democrats, mostly southerners, massed behind the bill introduced by Representatives Phil M. Landrum (Dem., Ga.) and Robert P. Griffin (Rep., Mich.).

They substituted it for a measure drafted by the House labor committee. Democratic leaders mustered 184 Demo-

crats and 17 Republicans for the committee bill its backers termed a middle ground approach to the problem.

✓

That left only the formality of a vote on final passage.

However, there was some question as to what will happen to this bill once it gets into conference with the Senate. Last April, the Senate passed a labor control bill that

stops well short of some of the stringent provisions in the Landrum-Griffin version.

Both the committee bill and the Landrum-Griffin version were patterned after the Senate bill. Both contained clauses intended to protect the rights of union members, to ban "blackmail" picketing and to require union financial reporting.

Lions' Fans Have Hopes For Playoffs

Bombers Ramble in Second Half To Hand B.C. 42-20 WIFU Defeat

(By Canadian Press)

Football eyes shift to Regina tonight for the second struggle of the Western Interprovincial Football Union season. A thriller opened the season Thursday night in Vancouver as Winnipeg Blue Bombers thumped British Columbia Lions 42-20.

The second game puts Saskatchewan Roughriders, who have absorbed two exhibition beatings this week, against Calgary Stampeders.

The Grey Cup champion Bombers were favored to beat Lions and though coach Wayne Robinson's coast crew made a strong bid in the first half, it couldn't contain the powerful Winnipeg club.

Bombers rushed for 326 yards to B.C.'s 129 and right-handed quarterback Jim Van Pelt, a cast on his left wrist, tossed three touchdown passes and went over for a TD himself.

SCORE NOT INDICATIVE

The game was closer than the score indicated and 29,425 fans, who have never seen Lions beat Bombers since B.C. entered the WIFU in 1954, went home with hopes their club might make the playoffs.

End Frank Gilliam and half-back Leo Lewis each counted two touchdowns for Bombers. Van Pelt and fullback Charlie Shepard had one each. Van Pelt also kicked a field goal and Shepard added a single on

GRID SUMMARY

WINNIPEG 42, B.C. 20
FIRST QUARTER
1. B.C. field goal (Kristopaitis) 7:39.
2. Winnipeg, field goal (Van Pelt) 14:12.

3. Winnipeg, touchdown (Shepard) 6:58.
4. B.C., touchdown (Veresh) 3:37.
5. B.C., convert (Kristopaitis).
6. Winnipeg, touchdown (Lewis) 7:20.
7. B.C., field goal (Kristopaitis) 13:29.
THIRD QUARTER
8. Winnipeg, touchdown (Van Pelt).
9. B.C., touchdown (Lofstrom) 8:41.
10. B.C., convert (Kristopaitis).
11. Winnipeg, single (Yamamoto) 12:12.
12. Winnipeg, single (Yamamoto) 14:23.
FOURTH QUARTER
13. Winnipeg, touchdown (Gilliam).
14. Winnipeg, convert (Shannon) 7:20.
15. Winnipeg, touchdown (Lewis) 8:58.
16. Winnipeg, touchdown (Gilliam) 12:12.

THE SCOREBOARD

BY

Harry Grayson

NEW YORK—If Luis Aparicio and Nelson Fox are not carrying the White Sox, they at least give the Singles Wonders a fine running start.

Aparicio walks and steals second. Nellie Fox singles and the Singles Wonders have the one run by which they have won nearly half their games.

If the Singles Wonders win Chicago's first American League pennant in 40 years in the old-fashioned way, with excellent pitching and a stout defense and without much semblance of the long ball, Aparicio and Fox will join the ranks of all-time great double-play combinations. Aparicio and Fox have stood out for three years, but the ballplayer does not become a man of distinction until put in the showcase that is the World Series.

Fox, 31, was a gift from the Athletics. Aparicio, now only 25, was discovered by Luman Harris, then a Chisox coach, while he was managing Caracas in the Venezuelan Winter League.

★ ★ ★
Aparicio, who stands five-eight and weighs no more than 157 pounds, now is recognized as the slickest fielding shortstop of all-time by renowned authorities headed by Casey Stengel.

"I've seen a lot of them, starting with Honus Wagner at the tag end of his career," says the venerable manager of the Yankees, "but this here kid is the best."

★ ★ ★
"Ap-par-each-ee-oh has sure hands, a strong, accurate arm and prairie-wind speed," says Al Lopez, who came to the Singles Wonders with the youngsters and was delighted with him from the start. "Giving Ap-par-each-ee-oh a tremendous advantage in the field and on the bases is the fact that he is in high speed with his first step. This and his extraordinary anticipation and skill accounts for the fact that he individually has stolen more bases than any club."

"Ap-par-each-ee-oh does everything better than any other shortstop I have ever seen and he's a stickout clutch hitter and shrewd judge of the strike zone, batting .275."

★ ★ ★
Making Aparicio all the more amazing is that the soft-spoken lad from Maracaibo performs his feats of legerdemain in these days and nights of the jackrabbit ball, when it is hit to either side of him with the speed of a bullet. Aparicio has a wider range in all directions than any other shortstop, has no peer at coming in on slow rollers or going out for short flies.

After all, he was raised to be a shortstop. His father was one before him and he modeled himself after the countryman he succeeded, Chico Carrasquel.

★ ★ ★
For some reason that passed on with him, Connie Mack of the then Philadelphia Athletics gave up on Fox before he was 22 and after signing him at 16. When young Foxie was put on the waiver list and the Senators passed to claim him, Mack told his old friend, Clark Griffith, that he was wasting his money.

So the White Sox obtained Foxie on Oct. 18, 1949, for an obscure catcher named Joe Tipton, and haven't been out of the first division in eight years, nor worse than second the last two.

★ ★ ★
Foxie is well on his way to leading the American League in hits for the fifth time. There are faster second basemen, second basemen with better arms and more power, but Foxie knows how to play the hitters and more than makes up for any shortcomings with burning desire. Another strong recommendation for the tobacco-chewing, cigar-smoking Foxie is that he is never hurt. He currently has played in more consecutive games than any other major league player, Ap-par-each-ee-oh and Fox.

They make the White Sox.

Put 'em in the World Series and lyrics will be written about them.

BRING ON THE MCC

Exchanging information that might be useful in Sunday's match against touring Marylebone Cricket Club are Rob Wilson (left) and Jack Sparks, who oppose visitors with Victoria and District Cricket Association All-Stars. Wilson, a former Cambridge University

city star, played against MCC in England, while Sparks was member of Victoria team which met touring MCC side here in 1951. Sunday's match at Beacon Hill starts at 11:15. Stumps will be drawn at 6:30. (Times Photo by Bill Halkett.)

Tourists in Fast Finish To Edge Mainland Side

VANCOUVER

England's touring Marylebone Cricket Club tackled Western Canada All-Stars today after squeezing out a last-over victory over the Mainland Cricket League all-star side Thursday.

MCC staged a furious finish to avoid draw Thursday,

taking two Mainland wickets in the last over, one of them on the final ball of the match.

Victory kept the club's unbeaten record intact, although two Eastern Canada sides held the English cricketers to draws.

Thursday, the MCC declared

with 249 runs for six wickets after 3 1/2 hours of play and began the last over with the B.C. side 134 for eight.

A draw was indicated, but Robert Barber, a 23-year-old Cambridge cricketer who was a sensation as a schoolboy at Ruthin, took the last two wickets without permitting a run. He clean-bowled Robin Johnston, then had George Nugent stumped by wicket keeper A. C. Smith on the last ball of the match.

R. M. Prudeau, a Cambridge freshman, was leading batsman, scoring 66 runs before being caught. Smith was 53 not out and D. J. Green scored 49.

Barber was MCC's leading bowler, taking three wickets for 19 runs. Smith took three for 39.

B.C.'s leading batsmen were

Lloyd Edwards, formerly a Trinidad College player, with 30 and Dave Foster and Dr. Michael Livingstone, not out, with 26. Livingstone was at bat for more than 90 minutes.

Robin Johnston was the leading B.C. bowler, taking three MCC wickets for 63 runs

Second-Round Tennis Results From Duncan

DUNCAN—Play in both the Vancouver Island championships and Pacific Northwest sectionals went into the third day today at the Cowichan Lawn Tennis Club courts south of Duncan, where entries from B.C. and western United States seek honors.

Results in the second round of play Thursday for the men's open singles championship of Vancouver Island were as follows, with the winner being first mentioned.

B. McCoy, T. Cummings, 6-2, 6-2; W. Lowes, R. Peckett, 6-1, 6-2; Bardeley, D. Hunter, 6-1, 6-2; W. A. Shoemaker, 6-3, 6-1; E. Williamson, A. Skelton, 6-1, 6-1; T. Damiani, D. Williamson, 6-1, 6-2; L. Ledington, T. Clarke, 6-4, 6-2; C. Clegg, Kermode, 6-2, 7-5.

Women's singles, Vancouver Island championship, third-round play results: V. Williamson, Europa, def. G. Trembley, Victoria, 6-4, 6-1; P. Anstey, Vancouver, def. J. Peacock, 6-4, 6-1; J. Peacock, Vancouver, def. R. Peckett, 6-0, 6-1.

Men's sectional singles: J. Lowe, Seattle, def. J. Skelton, Vancouver, 6-1; L. Barclay, Vancouver, def. W. Peacock, 6-1, 6-2.

Vancouver Island championships men's doubles open play: K. Clegg, J. Lowe, R. Peckett, 6-1, 6-1; L. Barclay, J. Skelton, 6-1, 6-2; W. Lowes, R. Peckett, 6-1, 6-2; D. Williamson, 6-1, 6-2; T. Damiani, R. Peacock, 6-4, 6-1; D. Williamson, 6-1, 6-2; T. Damiani, R. Peacock, 6-4, 6-1; R. Peckett, D. Williamson, 6-1, 6-2; D. Swanson, D. Rosemurgy, 6-2, 6-2.

Second round play, senior singles Vancouver Island championships: M. Dranga, Seattle, def. W. A. Shoemaker, 6-1, 6-2; J. Bardeley, Vancouver, def. D. Williamson, 6-1, 6-2; E. Kermode, Vancouver, def. D. Nevin, Seattle, 6-4, 6-3.

Speeding Fine In 60-Mile Zone

(From Duncan Bureau) William Alec Semeyn, 3125 Uplands Road, Victoria, pleaded guilty in Duncan police court Thursday to a charge of speeding on the Trans-Canada Highway, near Duncan, Aug. 6, and was fined \$25 and \$5 court costs or 30 days.

An RCMP radar check pointed Semeyn's speed at 70 miles per hour in a 60-mile zone.

"If we put the speed limit up to 80 miles an hour some of you people would drive 90 miles per hour," Magistrate A. C. Sutton remarked.

Duncan Cow Top Producer

(From Duncan Bureau) DUNCAN—Don Morton, Duncan, is the owner of the leading Ayrshire producing cow in the country in the class for animals of 10 years and over, according to the Ayrshire Breeders' Association of Canada.

Haugland Bessie gave 11,569 pounds of milk and 537 pounds of butterfat in 305 days, beginning her last lactation at 11½ years. She now has a lifetime production of 105,375 pounds of milk and 4,318 pounds of butterfat in nine lactations, and has been awarded a gold seal certificate. She has been type classified as "excellent."

Cowichan Fair Ground Opens

Ceremony Marks Milestone for Exhibition First Held by Farmers in 1868

(From Duncan Bureau)

Deputy Agriculture Minister William MacGillivray, Victoria, cut the white ribbon across the entrance to the newly-constructed administration building Thursday at 3 p.m. to open the new eight-acre Cowichan Exhibition fair grounds at Duncan.

Stanley Owens, president of the Cowichan Agricultural Society, handed the scissors to Mr. MacGillivray to perform the ceremony.

The deputy mentioned the long history of the exhibition, beginning with the first fair held when the farmers of the Cowichan Valley collaborated with the farmers of Salt Spring Island in 1868.

Two cheques were presented to exhibition president Archie Stevenson. Ald. John Kerrone gave \$4,000 from the city of Duncan, and Mr. MacGillivray presented a cheque for \$5,000, second of three government grants for that amount.

Coun. Don Morton of the municipality of North Cowichan was master of ceremonies.

RE-ESTABLISHED

Mr. Stevenson thanked the federal and provincial governments, heads of civic, social, and business organizations, and social and service clubs, who had helped re-establish the exhibition.

"The fair is a development we owe to the youth of our community," Mr. Stevenson said.

Many dignitaries were present, including Maj.-Gen. C. A. P. Murison, reeve of North Cowichan; Mayor J. T. Dobson, Duncan; David H. Owen,

D. D. Clarke, Lands End Road, on the North Saanich peninsula, saw the blaze at 3:30 a.m. and notified L. H. Lorentzen, ranger here. It was controlled shortly, and was kept under guard for the next 24 hours.

Fresh orange peels were found near the wreckage.

Firefighters had to rely on water pumped from small waterholes far down the mountain, and relayed to the blaze.

GANGES—A forest fire which broke out early Tuesday morning on Mount Tuam, at the southern end of Salt Spring Island, was blamed on souvenir hunters examining the wreckage of an air force plane which crashed Jan. 4, 1944.

DIGGING INTO THE PAST

Museum Offers Word of Caution To Private Artifact Collectors

MONTE
ROBERTS

Some of my best friends are people...

Friend Jack Dalby was over here from (excuse the expression) Vancouver the other weekend... with him was friend Ted Booth... and while here they gathered unto their bosoms, friend Wally Courtney... all three friends are employees of the well-known airline which operates unprofitable flights daily across the Gulf... so how did Dalby & Co. arrive?... in a 16-foot Fiberglas outboard... and when Dalby & Co. returned to you should excuse the expression-Vancouver, it was in the 16-footer and on the same day the Washington State Ferries' king-size Kalakala passed up the Port Angeles-Victoria run because the wind and seas were too nasty... Dalby should stick to Hi-Fi...

And while we're on the subject of small boats, friend Miles Smeeton has had published a book about his two attempts to 'round Cape Horn in the yacht *Tan Hang*... (more of this in an upcoming Times book review)... friends of Miles and wife Beryl and friend John Guzzell and my special friend, the Siamese cat Fwe will be glad to know they didn't drown... they didn't make it, either... and they have convinced me I would be glad to round the Horn anytime in a small boat, say one about the size of the Queen Elizabeth... mind you, I would insist on wearing my life-jacket and snorkel at all times...

Imagine my next letter from friend Archie Moore will be marked "postage due"... Archie put so many stamps on *Yvon Durelle*, how could he have any left over?... Glad to see friend Bill (Trent) Frayne writing about friend Jack (Butch) Wells in the current issue of *Maclean's*... but sad to note Bill didn't record the deathless moment of Wells' wedding reception (held in Winnipeg's Caberet) when he, the bridegroom, gave a rendition of "Sam, you made the pants too long..." and proved it.

Still enjoying the two-week-old television interview between friends Jim Coleman and Max Baer... when Max assessed the respective fighting abilities of (quote) Peterson and Johnson... which brings to mind the time Van, the surviving partner of Van and Schenck, was doing a single at a Toronto supper club... a sudden heckler was taking dead aim at Van until a large figure loomed up from his table in the background and said: "You got something to say?"... suddenly, the heckler ran out of words... the large figure was owned by friend Buddy, Max's younger but bigger brother...

But for sheer fire when the chips are down, you should meet Thomas Cuff, the local operator for Canadian Press, who weighs in at 98 pounds when his dander is up... when Tommy is cross, you have a storm in a teacup. *

Some of my best friends ARE people.

TOPICS OF THE DAY

New Victoria Cougar hockey coach Hal Laycoo will be guest speaker at next Monday's noon luncheon of Victoria Gyro Club at the Empress Hotel.

A film on the Deas Island Tunnel will be shown at next Tuesday's meeting of the Kiwanis Club of Victoria North to be held in the Monterey Restaurant at 6:15 p.m.

Some 365 air cadets from British Columbia, the Yukon and other provinces of Canada are now attending the last of four two-week cadet camps at RCAF Station Sea Island.

The cadets, ranging in age from 14 to 18, are supervised by their own squadron officers under Wing Commander J. S. Niven of No. 1 Wing, Vancouver.

A total of \$133,995 was paid out to jobless people in Victoria during the month of July. The Unemployment Insurance Commission announced here today.

For the whole of the Pacific region, the sum of \$151,670 was paid out in benefits. This was \$307,330 less than the amount paid out during the previous month.

The RCN Band of HMCS Naden conducted by Commissioned Officer W. J. Gordon, LRAM, will give a concert in Gorge Park next Sunday at 3 p.m.

The program will include the march "Bond of Friendship," the overture "French Comedy," Beethoven's Pastoral symphony, a selection from Oklahoma and a trumpet solo, "Bugler's Holiday."

The 5th Independent Medium Battery, Royal Regiment of Canadian Artillery, will commemorate the 20th anniversary of the mobilization of the 5th (B.C.) Coast Brigade in the Bay Street Armory on Wednesday, Aug. 26.

The brigade was one of two units in Canada to be mobilized Aug. 26, 1939—16 days before Canada declared war on Germany. The other unit was an east coast artillery regiment.

Former members of the 5th wishing to attend the anniversary are asked to contact the 5th Brigade orderly room before noon on Aug. 24.

A team of professional and amateur archaeologists is carrying out a scientific "dig" in the Shoal Bay area at Oak Bay, in an attempt to learn secrets of 200 or even 5,000 years ago, by studying relics buried by time. The "dig" is under direction of the Provincial Museum. Progress reports appear daily in The Times.

By WILSON DUFF
Curator of Anthropology,
Provincial Museum

Thursday was the second day of the Provincial Museum's archaeological "dig" in the midden on McNeill Bay. Summer assistants John Sennedy and Richard Cox spent the day extending the first trench, while volunteer Edith Cross and I made a start on Trench B. The artifact count is still quite low, about 20. Perhaps in a couple of days we may begin to discern some patterns in our finds.

One of the kinds of food remains we save in the "associated materials" bag for each level is fish bones, and we have noticed that these are abundant in the midden. Last night at supper-time as I contentedly surveyed the fish bones on the side of my plate and mentally compared them with the ones from the midden, I felt a curious kind of kinship with the prehistoric Indians. John and Richard had set out lines from the rocks and caught three cod. Mine was delicious. I wonder how those others tasted, hundreds of years ago?

Do's and Don'ts

Perhaps the publicity on our dig has given others the idea of digging too. This may be a good time for some words of caution to would-be archaeologists.

If your aim is to find specimens for your collection, don't dig for them. There is an easier and better way to get them. Besides, your digging will destroy much valuable information.

Waste of Time

Digging is not nearly as rewarding as many people think, and for nice-looking "showcase" specimens, it is practically a waste of time. The artifacts we find during excavation are usually fragments which would be discarded, if in fact they were recognized as artifacts, by most collectors. The great majority of the beautiful and showy specimens in collections have been surface finds or have been turned up by accident. For example, out of the hundred or more of the finest prehistoric stone sculptures of B.C. described in my recent book, "Prehistoric Stone Sculpture of the Fraser Valley and Gulf of Georgia," only one or two were found in digs by archaeologists.

There will be partial clearing Saturday, though, with a mixture of sunshine and cloud," he said.

Winds Saturday will be westward at 15 to 25 miles per hour and temperatures will range between 52 and 68 degrees.

★ ★ ★

The SPCA will destroy a dog known to have bitten at least three persons, the last victim Judy Crawford, four, of 153 Wildwood, bitten this morning.

The SPCA told police there had been previous complaints about the dog and the neighborhood owner had been warned.

The Crawford child sustained a scratch near her eye.

★ ★ ★

The junior branch of the Victoria Natural History Society will meet on Saturday at 1:30 p.m. at the Monterey Restaurant parking lot for a field trip to the swamps at Royal Oak.

★ ★ ★

New chief of planning division, provincial parks department, is Bob Ahrens, 33, who has been 10 years in the parks service. He replaces Lloyd Brooks who recently transferred to the national parks service at Ottawa.

★ ★ ★

Automotive tools valued at \$50 were stolen from a car parked at the rear of his residence at 1387 Hillside. Frank Leibel told city police Thursday afternoon.

Cash and jewelry valued at \$460 are still missing following recovery of items stolen from a parked car at Beaver Lake, Saanich police reported.

Mrs. J. F. Dick, 2696 McDonald, said the property included \$60 cash and a \$400 diamond ring, which are still unaccounted for.

★ ★ ★

Janos Szekely, 2306 Belmont, was fined \$100 and his driver's license was suspended in Saanich police court Thursday for criminally negligent driving.

Police said the accused drove his car erratically on Patricia Bay Highway when traffic was heavy.

YOUNG ARTIFACT ENTHUSIASTS working at museum during school holidays are members of Shoal Bay

lectors of vandalism and the destruction of irreplaceable archaeological remains. In some places special legislation has been introduced to control the excavation of diggings.

Fortunately this conflict need not arise in our area. Collectors have an important role to play in discovering sites and making surface collections. All along our coastline are hundreds of middens being eroded away by tidal action. These exposed shell banks are excellent collecting localities. Other sites are constantly being revealed by plowing, house and road

driving.

Sharp-eyed collectors can perform a very important service by paying frequent visits to such places and collecting the artifacts which have come to light. This method is much more rewarding to the amateur than digging.

Tell Us 'Quick'

What should you do if you happen to find archaeological specimens? You should report them to us, and unless you are a serious collector, turn them over to a competent museum for proper care and use.

Any private person finding an important relic should ask himself very seriously: To what extent does this really belong to me? Perhaps such things are not properly private possessions, and are best cared for by museums representing all of the people.

Y

ou should make your collection available for study to museum and university archaeologists. Even though it remains in your possession there is no reason why it should not be used.

Finally, you should make provision for your collection when it leaves your personal care, for one reason or another. After all, if it is a good collection, it will likely come into a museum some day. We won't hurry you. We are willing to wait.

\$2 Million Plans Drawn To Modernize Airport

Plans for a \$2,000,000 modernization of Patricia Bay Airport have been drawn up into a department of transport brief according to a Thursday report.

Disclosure of the plans was attributed to Defence Minister George Pearkes. No official announcement has been made by Transport Minister George Hees. (Efforts to contact the two ministers for confirmation were unsuccessful.)

The report said longer runways and a new terminal are planned but no mention was made of relocating the Patricia Bay Highway.

This was one of the stumbling blocks Mr. Pearkes blamed for more than two years' delay since he announced runways would be

extended last winter and a new terminal constructed this summer.

The highway has to be realigned to enable extension of the main east-west runway from 5,000 to the 7,500 feet necessary for propeller-turbine aircraft like the Viscount Trans-Canada Airlines plans to use here in 1961.

CO-OPERATION

Highways Minister P. A. Gagliardi last year said the province would co-operate in relocating the highway but would not pay for the work.

"It is an unheard-of thing to ask us to build it (the highway diversion). They'll have to do the job," Mr. Gagliardi maintained at the time.

Technical work for a relocation

tion has been completed but no formal request for diversion of the highway has been received by the provincial highway department.

The modernization plans call for expenditure of \$1,400,000 on runway extension and taxi strip improvement; \$50,000 on the first stage of a proposed \$1,000,000 air terminal; \$103,000 on improving operational work.

Two of the parcels are for natural gas only.

Particularly high bids are expected on 10,400 acres in the Kotcho Lake district near the recently brought-in huge Gulf States Oil Co. of Canada natural gas well which may be among the largest in the world.

THE

Indian Council Advisory Post To Saanich Man

A Saanich man is included in appointments of a new chairman and two new members to the B.C. Indian Advisory Council announced today.

G. E. Gerhart, 82, West Vancouver will be chairman, filling the post vacated by the death of Dr. F. H. Morrow. New members are Mrs. Kitty Carpenter of Bella Bella and Chief Edwin Underwood of the East Saanich Tsawout Band.

The single case here was reported in Vancouver in June and the low rate was explained by provincial health authorities today as due to a low-cycle year and the widespread Salk vaccine immunization program.

It is estimated 95 per cent of B.C. youngsters under 18 have been immunized and about 60 per cent of adults under 40.

Ottawa health authorities said 15 persons, five from Quebec, had died of polio from Jan. 1 to Aug. 8, and on the week ending Aug. 8, 87 new cases were reported, 75 in Quebec.

The figures are expected to show a further substantial increase for the week ending Saturday.

THE

ASK The TIMES

Q. How many areas make up the USSR? F.S.

A. Fifteen republics, comprising an area of 8,500,000 square miles.

Q. How did John D. Rockefeller get his fortune? L.S.

A. From oil. He built the huge Standard Oil Co. before his death in 1937.

Anyone winning a question answered is invited to send the problem along to The Times, Editor, Questions and Answers will be published daily.

All questions and answers will be kept secret and no names will be mentioned.

The Times does not undertake to solve commercial or legal problems. Nor will it attempt to find a "Times of the week" or "Times of the month" to be submitted to doctors.

PENNY SAVER IS VACATIONING!

Shopping Guide will be missing from this corner for two weeks while Penny Saver is on annual vacation. Last week in August, however, the popular daily column will return to this page with new penny-saving ideas to assist you in balancing your budget.

DEAR ABBY...

Now She's Cold and Miserable!

By ABIGAIL VAN BUREN

DEAR ABBY: A year ago I met a man who made me feel warm, secure and loved. He appeared to be hard-working, loving and understanding. He told me he was a retired army officer, drawing a good pension, which he was saving.

I married him. Now I find out that he is the biggest liar I ever met. He hasn't saved a dime. I had to sell my house, my car and my baby grand piano to help get him out of debt. I've never seen his pension check. He tells me he sends it all to the Orphanage that raised him.

You've got to give me some advice, Abby. He says if I leave him, he will kill me. Do I have to put up with this?

LIVING IN FEAR

DEAR LIVING: See a policeman, a clergyman and a lawyer—and in that order. A man who threatens to "kill" is not fit to live with. He married you under false pretences. There are laws (civil and canon) to protect women from men like him.

★ ★ ★

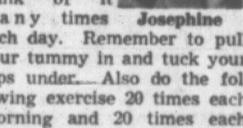

DEAR ABBY: I need this one question answered to be happy. How do you forget a boy when you know he is no good? My head tells me he is bad for me, but my heart tells me I still love him. Can you help me, Abby? I am 18 years old, and have no mother.

SAD GIRL

DEAR SAD: The saying "Out of sight—out of mind" is a good one. Avoid him. Keep very busy doing things that require your full attention. Throw out all the "things that remind you of him." See other people and pray for strength.

★ ★ ★

DEAR ABBY: I have an old girl friend and I am very fond of her. My problem is—my husband can't stand her. There is nothing wrong with this girl. He has seen her only a

WHY GROW OLD?

By JOSEPHINE LOWMAN

Improve Sway Back
By Improving Posture

Q. "I am 15 years old and have a swayback. Are there any exercises I can do to correct it or improve it? I am very embarrassed about this."

A. You can improve swayback by improving posture. In the first place think of it many times Josephine each day. Remember to pull your tummy in and tuck your hips under. Also do the following exercise 20 times each morning and 20 times each night! Lie on the floor: Bend both knees and place your feet flat on the floor. Try to touch your entire back to the floor. If you cannot touch the middle of the back pull it down toward the floor as far as possible. Hold while you count 10 slowly. Relax and continue.

Q. "I read your column every day. I am 23 years old and have a large frame. I am 5 feet 6 1/2 inches tall and weigh 158 pounds. I think I am too fat but my husband doesn't think so. My bust measures 41 inches, waist 31 1/2 and hips 42 1/2. Please advise me."

A. Your measurements are in good proportion. According to ideal weight and height charts, you are just right for the age of 30. I do not know whether or not you have correctly determined whether you have a medium or large frame. This is difficult to do and it makes quite a difference in the weight you can carry attractively.

I am inclined to think that you are overweight, and should lose from 10 to 15 pounds.

Hold while you count 10 slowly. Relax and continue.

Liz Likes
'Em Short

PARIS (AP) — Elizabeth Taylor goes for the new "peek-a-boo-knees look" at the House of Dior.

The movie star has just bought 10 models from the collection designed by Yves St. Laurent.

At least four are the short hobble-hemmed styles, shock numbers of this year's fall fashion showings in Paris.

Will Liz actually show her kneecaps like the Dior mannequins?

A spokesman for the fashion houses said: "The customer always decides the length she likes at fittings, so we don't know yet. But we have the impression she likes them short."

Made of pyroceram this new kitchenware can be used over intense heat on top of the range, then go to the table for serving. Handle shown can be locked on the dish with a simple twist.

Use In Oven, Under
Broiler, In Freezer

Ever try to take a flaming hot glass saucepan, right from the stove and dump it in a pail of ice water?

How about putting the same glass saucepan, filled with frozen food, from the refrigerator to a really hot element of your stove?

No? You wouldn't think of doing either thing? You prize your kitchenware to highly to risk cracking, warping or breaking from actions you most likely are saying right now, would be foolhardy.

A famed glass works was consulted. Its scientists and engineers came up with this new material that starts as glass and ends as a super-white material.

Today, all nose cones of guided missiles in the States are made of the shiny, milky-white ceramic.

From the missile field it was only a matter of time until someone in the glass industry came up with the idea that if this miracle ceramic could withstand such terrific heat and cold then it was a "natural" for a new and better kitchenware.

The new ware, born a glass but changed in production furnaces into a fine, smooth ceramic, will be shown in several sizes of frying pans and saucepans and in a super-skillet and a coffee percolator.

A detachable handle makes it possible to pick any of the pans out of oven, broiler, or from the top of the stove and

bring them right to the table. (There's also a smart wire cradle to hold the hot dishes.)

Discovery of this new ceramic was made through guided missiles.

When these missiles were in the experimental stage in the United States, it was found that the metal nose cones could not withstand extreme heat and cold.

OF PERSONAL INTEREST

Dinner Dance

A dinner dance will follow a mixed foursome next Friday at the Victoria Golf Club. Members taking part will gather to enjoy a buffet supper and to dance to Len Acres' Orchestra in the evening.

Flies Overseas

Mrs. W. M. MacKenzie, Haultain Street, left by air this morning for a two-month trip to England. While overseas, Mrs. MacKenzie will visit her mother in Belfast, Ireland, and sisters in the Isle of Wight.

Year Abroad

Mrs. Macgregor Macintosh, Victoria, sailed in the Homeric from Montreal on Thursday, on a trip to England. With her are her son, Ian and daughter, Mrs. Bruce L. Boyd, Vancouver. The trio will spend a year overseas.

Weekend Home

Spending the weekend at the Ardmore Drive home of her parents, Mr. and Mrs. C. M. Robertson is Miss Buntie Robertson, Vancouver.

Vancouver-Visit

Miss Susan Reid, Victoria, is spending several days in Vancouver, visiting Miss Tricia Edgell there. She will return this weekend.

After Rehearsal

Following the wedding rehearsal this evening of Miss Patricia Rogers and Mr. James Fletcher Broughton, whose marriage takes place on Saturday in St. David's-by-the-Sea Anglican Church, a party will be held at the home of the bride-elect's parents, Mr. and Mrs. B. T. Rogers on Cordova Bay Road. Among those invited are the Misses Linda Tucker, Jane Ward and Joy Anderton, all bridal attendants; Mr. Fred Ilott, best

man, and ushers, Mr. David Broughton and Mr. Irvine Rogers. Also attending are relatives and friends of the affianced couple.

Back Home

Mrs. H. H. Claudet, who went to San Francisco for the marriage of her daughter Frances and Mr. Worthington Johnson, last week, returned to her Beach Drive home on Wednesday.

At Fulford

Co-hostesses Mrs. F. Hollings and Mrs. C. Lee recently honored Mrs. Tim O'Donnell, nee Darlene Akerman, with a shower at the Fulford Harbor home of the bride's parents, Mr. and Mrs. R. M. Akerman.

Gifts filled a decorative cart which was drawn by Mrs. O'Donnell's two small brothers Paddy and Jimmy Akerman. Corsages were presented to the guest of honor, to her mother, and her mother-in-law, Mrs. T. O'Donnell.

Christening

Nancy Phyllis were names given the four-month-old daughter of Mr. and Mrs. Basil Robinson of Richmond, B.C., at a christening ceremony in St. Mark's Church on Salt Spring Island. Rev. C. S. Coldwell officiated. Tiny principal wore an heirloom embroidered robe belonging to her paternal grandmother, Miss Ruth Streeton, Johannesburg, South Africa, was named godmother for her cousin. Following the ceremony, the baby's grandparents, Mr. and Mrs. H. A. Robinson, entertained at tea in their Vesuvius Bay home.

MONTREAL (CP) — Accidents kill more children than anything else.

Faceted with this menace, more than 1,600 doctors from 63 nations spent a full day recently on childhood accidents. Their cause and prevention meeting is part of the ninth International Congress of Pediatrics.

Experts talked to them—and sounded new hope in halting senseless mishaps to youngsters. Infants and young children fall from windows, burn themselves, get hit by cars,

gobble poison, suffocate in plastic bags, drown in baths and at beaches—all accidents that not have happened.

TODDLERS SUSCEPTIBLE

The inexperienced creeper and toddler is the most susceptible to accidental injuries," said one speaker, Dr. Harold Jacobziner, assistant commissioner in the New York health department.

And nearly seven of every 10 accidental injuries to children under five occur in the home, he added.

Dr. Paul F. Wehrle of New York said the two-year-old toddler is the likeliest victim of accidental poisoning. He reached this conclusion after a study of Syracuse, N.Y.

More than half of the poisoning episodes there, he said, were caused by various types of medicines. In almost half of these cases, the toxic agent was flavored aspirin.

ACCIDENT PRONE

Dr. George M. Wheatley, vice-president of the Metropolitan Life Insurance Company, said doctors some day may be able to spot youngsters who are most apt to be hurt or killed in accidents.

"Accidents do not occur by chance alone," he said.

"One study of nursery school children found certain personality characteristics as-

ociated with a tendency toward accidental injury."

Impulsive, emotional children—the daredevil types who were always on the go—were hurt or killed more often than youngsters who were passive, co-operative, eager to please, and not inclined to engage in group play.

He suggested the same factors that underlie childhood accidents may also be linked to other behavior problems, including juvenile delinquency and drug addiction.

"Accidents do not occur by chance alone," he said.

"One study of nursery school children found certain personality characteristics as-

ociated with a tendency toward accidental injury."

Impulsive, emotional children—the daredevil types who were always on the go—were hurt or killed more often than youngsters who were passive, co-operative, eager to please, and not inclined to engage in group play.

He suggested the same factors that underlie childhood accidents may also be linked to other behavior problems, including juvenile delinquency and drug addiction.

Dr. Paul F. Wehrle of New York said the two-year-old toddler is the likeliest victim of accidental poisoning. He reached this conclusion after a study of Syracuse, N.Y.

More than half of the poisoning episodes there, he said, were caused by various types of medicines. In almost half of these cases, the toxic agent was flavored aspirin.

ACCIDENT PRONE

Dr. George M. Wheatley, vice-president of the Metropolitan Life Insurance Company, said doctors some day may be able to spot youngsters who are most apt to be hurt or killed in accidents.

"Accidents do not occur by chance alone," he said.

On Etiquette

Sunday Problems:
When two invitations are sent to a couple and mother living at the same address, would it be correct to acknowledge with one acceptance for all three? If so, how should it be worded?

Louise Davis Answers:

Correctly, the two invitations should be acknowledged separately. However, failing for the temptation with an answer for all three shouldn't brand you as being incorrect. The blanket acceptance would be worded thus: (separating the lines in their proper places) Mrs. Herbert Smith and Mr. and Mrs. Chester Brown accept with pleasure Mr. and Mrs. Jones' kind invitation for Saturday, September the nineteenth.

If a man is John Doe and his son is John Doe, Jr., is it correct to name the latter's son John Doe III? My sister-in-law says no. Right or wrong, the baby has been named John Doe III.

Louise Davis Answers:
John Doe III is correct, for he is the third one in the family named John Doe and therefore must be distinguished from his father and his grandfather.

TODAY'S RECIPE

KOTTBULLAR (or Swedish meat balls)—1½ lbs. lean, very finely ground beef, round or butt; ¼ lb. finely ground veal (no skin or tissues); ½ lb. very finely ground pork (half fat, half meat); 3 cups white bread crumbs (no crust); 2 pints light cream, 2 onions, finely chopped; ½ cup finely chopped parsley, ¼ lb. butter. Salt to taste, pepper to taste. One soup spoon accent and dash of nutmeg.

Place ground meats in large mixing bowl, add salt, pepper, nutmeg and accent. Stir in bread crumbs soaked in milk and 1 pint light cream slowly and keep stirring until batter is firm. Add chopped onions simmered in butter without taking color. Also add chopped parsley. Stir well. Form into small balls and fry in butter until lightly browned. Take out of pan. Stir 2 soup spoons flour in pan and ½ pint cream. Flavor with meat extract (Bovril) and a little accent. Place meat balls in gravy and let simmer for 10 minutes. Add more cream if necessary. (Serves 8 persons.)

Wax Turnips

Many turnips and parsnips available on the market are waxed to prevent loss of moisture.

Safe Foundation for Travelling by Car Important

More and more vacationists are simply "taking to the road" these days with no formal plans or schedules to follow. Modern highways and attractive motels or camping sites are found in all parts of the country. They make it easy and pleasant for motorists to drive and stop over at their will. Whether you are setting off for a full two weeks or just a weekend trip it is important to have your car—especially the tires—as

ready for a holiday as you are. It is worthwhile to have your tires checked both inside and out before leaving. Tire failure on the highway can at worst spell disaster; at best, an irritating or costly delay in your vacation plans.

All flat tires are not caused

by punctures. Tires weakened by moisture, bruises or heat, can give out at any time. This type of tire damage is not visible from the outside, so it is best to have a competent

serviceman examine your tires and check the casing for cuts, breaks or other damages. A bump last winter may have damaged the tire cord which will fail when summer driving brings extra heat and flexing to the weak spot. Similarly, the everyday driving you do around town also presents hazards for your tires. They are often slammed into

curbs, jolted by holes in the pavement, subjected to quick starts and stops, rain and puddles, snow and slush.

To help overcome these problems, manufacturers are now putting the same durable textile fibre into passenger car tires that has long been used in airplane and truck tires. Nylon, with its out-

standing resistance to heat, impact, flexing and moisture, has gained rapid recognition as the safest tire reinforcing material. Equipping your car with nylon cord tires is the best protection you can have. However, regardless of what type of tires you own, have them completely looked over before long drives.

1012 GOVERNMENT or 1400 BLOCK DOUGLAS

140 Museum Guards Fired

CAIRO (AP)—The government's new emergency curator at the Egyptian museum fired 140 guards Thursday and moved swiftly to protect its treasured antiquities from further thievery.

The sudden reform measures are being put into force by Salim Hassan, noted Egyptologist who was brought out of retirement to take over after it was discovered accidentally that a 33-centuries-old sceptre of the pharaoh Tutankamen had vanished from the museum.

It was reported subsequently that many—perhaps 25,000 items—had disappeared in the last 30 years of slipshod handling at the museum. The total value is beyond estimate.

Besides ordering the 140 guards replaced, Hassan began recruiting a staff of Egyptologists to conduct the museum's first inventory in 30 years. Egyptologist Kamal Malak estimated that the missing sceptre would be worth about \$3,000,000 to a foreign museum.

Proud Bing Plans to See Sons' Show

SEATTLE (AP)—Bing Crosby said Thursday by radio telephone from a yacht 450 miles north of here he is intensely proud of his four older sons and plans to see their act soon.

"I'll probably catch their show in Las Vegas right after Phil Harris and I return in two or three days from this fishing trip," Crosby said.

He declined to comment on published reports quoting his oldest son, Gary, 26, as saying he and his father are estranged.

Bing did say though, he had read all the reviews of his boys' appearances in Las Vegas, Chicago, Washington and other cities and was delighted they were favorable.

Stanley Cheeseman and schoolday memento.

CENTRAL IN 1898

Old School Spire Nostalgic Item

the school board—if they want it."

Built in England of heavy wrought iron, the spire was brought to Victoria around Cape Horn when the old central school was built in 1876.

Mr. Cheeseman came to Victoria when he was five years old and began attending the school a year later.

Speaking of "hard knocks," he recalls that the principal in those days was John Gillis, popularly known as "Gillie."

"He smacked plenty of heads," Mr. Cheeseman said, "but he was a great teacher just the same. Most teachers were tough in those days. Now they've gone too far the other way—they're too easy with the youngsters."

Later Mr. Cheeseman attended Victoria High School under Dr. S. J. Willis, and then embarked on a teaching career of his own.

He was vice-principal of Victoria West elementary, and after service in the First World War, taught for 18 years in Prince Rupert schools.

H. David Pottinger, 1080 Tattersall
Ave., Victoria, B.C. at St.
Joseph's Hospital on Aug. 13, 1959,
a daughter, Karen Arlene.
Also a son, Ronald Wayne, a
brother for Gary.

RUSSELL—Born to Mr. and Mrs.
G. W. Russell, 325 Bled Ave.,
Victoria, B.C. on Sunday, August 9,
1959, a son, Ronald Wayne, a
brother for Gary.

2 ENGAGEMENTS

BAIRD-BRYSON—Lt. Col. and Mrs.
D. Baird of 200 Marine Street,
announce the engagement of their
only daughter Joan, to Dr. Wil-
liam T. Bryson, only son of Mr.
and Mrs. Bryson of Cadboro Bay Road. The wedding will
take place Saturday, September
12 at 10 a.m. in St. John's Anglican
Church, with Canon G. Biddle
officiating.

3 MARRIAGES

JOHNSON—CLAUDET—The mar-
riage took place in San Francisco
between Mr. and Mrs. Francis Mary
Claudet, daughter of Mr. H. H.
Claudet and Mr. and Mrs. Worthington
Johnson, son of Mr. and Mrs. William T. Johnson of
Pittsburgh, Pa.

5 DEATHS

BROWN—In Victoria, B.C. on
August 13, 1959 Mary Jane Bown,
born in England, resident of
Victoria, died yesterday. Her son
the late Arthur Barratt Brown
she leaves a daughter, Miss
Winifred Bown of the family
home. Her son, George, an
engineer. She was a member of
Matthew's Anglican Church,
Langford.

Funeral services will be held in
St. Matthew's Church, Langford,
on Saturday, Aug. 15, at 1 p.m.
Rev. J. F. Page officiating.
Interment in Horseshoe Bay Burial
Park. In lieu of flowers friends may
contribute to the Shantyman's Association,
c/o Mr. D. Dicker, 3222 Shel-
burne Building, Victoria.

The words of the sermon—the
story of the play—the fun of
the family chapter, are all
the words that we use in
our daily lives.

TO LONGAGO—Dear Son,
I am so glad to see that
you have realized that what
people really wanted was
not your noise, and now they
have made all these things
clearly without strain. Come in
and try the new "Carillon" and talk
over your new love with
Humphrey Gohy, Northern Audio
Company, Langford.

SOLUTION MONDAY

Is there something you want to know? Do you want to win a set of valuable books or other instructive prizes? Then ask Andy.

Andy will answer questions submitted by child readers and those who submit the questions he selects to answer will receive worthwhile prizes.

The youngster who asks the first question answered each day receives 15-volume set of Compton's Pictured Encyclopedia (Canadian edition) and the second question a Hammond Atlas or Globe.

Address your questions to "Ask Andy," Victoria Daily Times.

Andy sends a complete, 15-volume set of Compton's Pictured Encyclopedia to James Bernhagen, aged 12, of West Allis, Wis., for his question:

How Do They Get Sulphur?

North America uses millions of tons of sulphur every year; yet in our everyday lives we rarely see it. Sulphur is one of those elements which works for us behind the scenes. It is needed to vulcanize the rubber for car tires, to make certain papers, dyes and paints. It is used in making matches, in certain cements and steels, in ointments, medicines and insecticides. Sulphur is even used as a plant food and a fertilizer.

This problem was a challenge to engineers. It was solved by drilling a pipe through the soft layers to the sulphur below. The drills require tall derricks and, when you see a sulphur field with all its derricks, you might mistake it for an oil field.

Reaching the sulphur with the drill is but half the problem. The next job is to get it up to ground level. Sulphur melts at about 112 degrees Centigrade, which is only a few degrees above the boiling point of water. This fact is used to get up the buried sulphur.

Pure sulphur is often found in the vents of old volcanoes. Long ago, most of the world's sulphur came from mining these old vents and craters.

The drill hole is lined with a casing to keep it firm. A six-inch tube is let down into the casing to the level of the sulphur. A three-inch tube goes inside the six-inch tube and a one-inch tube goes into the three-inch tube. Water is heated above its boiling point and pumped down between the six and three-inch tubes. It percolates through the sulphur and melts it. The deep base

of the drill now stands in a pool of liquid sulphur.

Compressed air now is sent down the little one-inch tube. It mixes with the liquid sulphur and turns it into a foamy mass. More air pressure is sent down the central tube. This forces the sulphur up through the three-inch tube. The foamy yellow stream is piped into a monster bin where it cools and becomes solid.

FOR ART'S SAKE

HOLLYWOOD (UPI) — Marlon Brando can be depended on to come up with something different—and he does in the film "One-Eyed Jacks," of which he is director as well as star.

In barroom scenes, the traditional painting of a half-clad maiden has been replaced by the "Mona Lisa."

WRIGLEY'S SPEARMINT CHEWING GUM

IT HAPPENED LAST NIGHT

By EARL WILSON

NEW YORK — Paul Newman's answer to Tony Curtis' crack that he's crazy to act on the B-way stage if he wants to be a movie star is: "He's right if you want to be just a movie star—but who wants to be just a movie star?"

After courteously explaining that he didn't want to clash with Curtis, Newman then let him have it with:

"Why didn't he use the word 'actor' instead of star?"

"Being only a movie star in the field of acting is like being a swimmer who never swims under water. No, that's a bad example. It's like being a great race horse, but he can't run in the rain."

"In pictures, you acquire certain successful mannerisms you can't get away with on the stage."

"On the stage you can't stop and say, 'I got off to a bad start. Roll 'em again, fellows.' Nor are you able to cut out a bad section."

"I have seen some people get lucky and do a movie scene right after seven takes."

"I hope to do a play every third year," said Paul, who's starring in "Sweet Bird of Youth." Gently, he added, "I know this slows down my movie career. But what the hell, I don't think being a movie star is the end-all of everything!"

The Midnight Earl — Hairdressers flipped over my blast at Anna Maria Alberghetti's new Italian, hairdo. Reporter Gael Greene's coiffure declared, as he excitedly pinned her chignon upside down, that Anna Maria's hairstyle "is the coming thing" — although he said he could do it better . . . A big ad for "Suddenly, Last Summer" will show Liz Taylor bending 'way over in a bikini.

Jackie Gleason moved into the Astor for his "Take Me Along" rehearsals. His pal Toots Shor said, "Bill Zeckendorf's too nice a guy to deserve that" . . . Terri Stevens, who's expecting, is clicking with her "Adonis" record same as expectant Lu Ann Simms is with "Do I Really Love You?"

EARL'S PEARS: A smart business man (says Buddy

KIM NOVAK

Morrow) is a guy who makes most of his income look like expense.

WISH I'D SAID THAT: Kim Novak says she'll do a B-way show if she can find the right vehicle. She can use my car any time — Eddie Condon.

TODAY'S BEST LAUGH: We forgot whether it was Sam Goldwyn or Arthur Murray who said foreign films are so successful, Hollywood should make some.

"Why don't the Gabors do a family autobiography," says Bill Shipley, titled "Goulash" . . . That's earl, brother.

UBC DEVELOPMENT FUND STANDS AT \$9 MILLION

VANCOUVER (CP) — The president of the University of B.C. said today that within the next year the university should be able to more than meet the provincial government's offer to match contributions up to \$10,000,000 for UBC development.

Dr. Norman MacKenzie, in his annual report, said the University Development Fund campaign in 1957 and 1958 was an "overwhelming success," and the fund now stands at more than \$9,000,000.

Island Mayor Bids to End Lumber Strike

The mayor of Courtenay, William Moore, is holding separate talks with both sides in the B.C. lumber strike today in an effort to reopen bargaining.

MRS. (MOM) WHYTE
... out of business

Children Neglected Judge Rules

HAMPTON, Ont. (CP) — Mrs. Bertha (Mom) Whyte officially went out of business today when Judge W. R. Phillip ruled that 107 children had been neglected in her unlicensed home at Bowmanville, Ont.

Judge Philip made his ruling after an hour of argument by Crown Attorney Harry Deyman and Mrs. Whyte's counsel, B. H. B. Bowley.

The judge said at the conclusion of a 2 1/2-day hearing there was sufficient evidence to show the home was overcrowded and understaffed.

Mrs. Whyte was in the courtroom for the verdict, but showed no emotion. Only minutes before the decision was announced, she told reporters:

"We're going ahead and we'll build a new Whytehaven regardless of the court's decision."

The 107 children were taken from her mission, about two weeks ago in a raid by welfare department workers.

SHOAL BAY 'DIG' IS ON

A scientific team of archeologists — professional and amateur — is carrying out a "dig" at Shoal Bay, uncovering relics of the past, and endeavoring to trace B.C. history, perhaps as far back as 5,000 years.

For today's progress report and advice to would-be diggers — see page 13.

Reappraise NORAD Share U.K. Times Urges Canada

See Page 25
LONDON (CP) — The Times says Canada ought to reappaise her share in the air defence of North America to avoid "an agonizing conflict" between the continental and Atlantic interests.

The independent newspaper, commenting on United States requests for improvement in radar coverage of the Pine Tree line, says air defence is

"a touchy subject" in Canada since American unwillingness to buy the Avro Arrow aircraft resulted in its manufacture being stopped by the Canadian government.

"But the trouble goes deeper than this," The Times editorial continues. "Canada has always clung to her Commonwealth and European associations — she keeps a brigade group and an air division in

Germany at great cost — as a counterbalance to the inevitable pressures on her from the United States.

"The American idea of air defence is that cities, industry and populations must all be actively protected as well as the deterrent bases. To many Canadians this savors of a Fortress America policy and there is an understandable fear that if Canada continues to be sucked into the vastly expensive business of air defence her continental commitments will come into conflict with her Atlantic interests."

The Times says there are also sound strategic arguments against the scheme. If the early warning system proves adequate to get interceptor aircraft off the ground before they are attacked, the nuclear deterrent remains valid and the active defence of air bases becomes an insurance policy, while that of cities, industry and population is sheer luxury."

Castro Captures Arms Plane Smashing Airborne Invasion

CANADA'S QUEEN

Edging out Victoria's Vivi Petersen, who placed second, 19-year-old Rosemary Keenan of Fredericton, N.B., was crowned Miss Canada at Burlington, Ont., Thursday night. (See story Page 2.)

BANK OF CANADA CLAMPS DOWN

Business Boom Tightens Loans

OTTAWA (CP) — Canada's latest economic boom appears to be threatening to bust out of its monetary britches.

The pressure — evidently resulting from strong demands for money with which to finance many and various new economic activities — tightened in two directions Thursday.

First, the Bank of Canada announced that its interest rate has stretched to a record 6.41 per cent. The rate's 43-per-cent increase from a week earlier was the biggest one-week stretch since it moved 45 per cent to 3.52 per cent last Dec. 10.

Following this announcement, the Canadian Bankers' Association announced the banks would have to "curtail further expansion in their lending policies."

Harold W. Thomson, president of the association, said in his press statement:

"The banks most regrettably are deprived of the flexibility necessary to make new loans in particular and, in a general way, to provide for increases in the amounts already borrowed under existing credits."

NO NEW LOANS

In simpler language, the bankers seemed to be saying they won't be making any new loans or expanding existing ones while this state of monetary affairs exists.

Since one reason for the present high interest rates is an apparent reluctance by both the government and the Bank of Canada to engineer any sharp increase in the country's money supply, the statement seemed to some observers a move to put pressure on federal monetary manipulators to loosen up.

The apparent reluctance by the government and central bank substantially to increase the money supply — although it has risen by some \$400,000,000

DON'T RELAX NIXON WARNS

SPRING LAKE, N.J. (AP) — Vice-President Richard Nixon made a comment of caution here in connection with the forthcoming exchange of visits between President Eisenhower and Russian Premier Khrushchev.

"Under no circumstances should this exchange of visits and the words that are spoken be used as any reason for us relaxing our defences," Nixon told reporters as he arrived to attend a United States savings bond rally here.

"If we are to have a possibility of agreement at a summit conference, the president must be able to talk from a position of strength."

COMMITTED

Charged with fatally shooting Det.-Sgt. Raymond Purdy while resisting arrest, Guenter Fritz Podola, was committed for trial at London's Old Bailey on Sept. 8 when he appeared in magistrate's court today. The case against the 39-year-old German, who went to Britain from Canada, was heard in secret.

Aerial Game Of 'Catch' For Capsule

VANDENBERG AIR FORCE BASE, Calif. (AP) — A fantastic game of catch was scheduled this afternoon thousands of feet above the Pacific Ocean if all goes well with satellite Discoverer V.

The object: To snare the satellite's ejected 300-pound nose capsule.

The purpose is to test the project's intricate electronics system, which someday may help propel man through space. An aerial catch also allows the least possibility of damage to the capsule's contents.

Discoverer V blasted off its launching pad at noon PDT Thursday and went into northernsouth polar orbit. It is circling the earth every 94 minutes, sending back loud, clear signals.

Eight C-119 Flying Boxcars are poised on Hawaii for the attempt to catch the instrument-packed capsule as it floats down under a parachute near the islands.

SLIM CHANCES

The air force says the chance of success is about one in a thousand.

Here is how it proposes to snare the capsule out of the air:

As Discoverer V makes its 16th pass a tracking station in Alaska will trigger the ejection mechanism. On the next pass the satellite, its position altered by compressed-gas jets, will tilt 60 degrees downward.

At the designated moment, explosive springs and bolts will separate the capsule from its vehicle.

Then the capsule will be slowed by a retro-rocket. A switch operated by forces of deceleration will release a parachute.

Guided by radio signals from the descending capsule, the Flying Boxcars will move in upon it in staircase formation.

Trapeze apparatus suspended from the rear of the C-119s will be used in an attempt to grab the capsule, which then would be reeled into the aircraft.

The planes have about 10 minutes to make a catch.

If the planes fail, two military vessels will attempt to pluck the capsule from the sea.

Scientists want to check its instruments for information that can be used in the forthcoming Project Mercury, intended to send man into space and bring him back.

When the capsule ejects from the second-stage rocket its vehicle will continue orbiting. The satellite's life is expected to be about 10 days, the air force says.

Dominican Chief Directly Blamed

HAVANA (UPI) — The government announced today it had smashed an airborne invasion from the Dominican Republic in central Cuba. It said the fighting was led personally by Premier Fidel Castro.

The announcement said the final blow to the attempted invasion came Thursday night when the Castro-led forces captured a Dominican C-46 transport plane which had flown in with another shipment of arms and munitions for the invading forces.

Four men were killed in the fight for the plane outside the city of Trinidad — two counter-revolutionaries and two members of the government forces.

The plane was reported piloted by former Cuban Lt.-Col. Antonio Soto and

a former Captain Betancourt were killed and six others injured out of a total of 10 occupants of the plane.

First photo from Trinidad showed the captured airplane parked along the runway, apparently undamaged. It was apparent the invaders landed without resistance and left the plane before the firing began.

Informed sources indicated it was likely the plane was lured into landing and the men aboard were surrounded after they left the plane.

Total Fighting Probably 5 Minutes

When they attempted to shoot their way out of encirclement, government troops under Castro's direct command returned fire, it was said. The entire clash probably lasted no more than five minutes.

The plane was a standard C-46, known in the Second World War as a Curtis Commando. Its only markings was the United States style registration number N18586 on the vertical stabilizer.

Trinidad is in Las Villas Province where Premier Fidel Castro personally has been directing government troops against a counter-revolutionary movement. The plane apparently was bringing in more leaders of the anti-Castro movement.

Castro and a number of his

Report to Nation Planned Tonight

The government said Castro had been on the scene for two days and would report to the nation tonight. This presumably would be the nationwide radio-television speech first expected last Saturday when Castro was reported ready to announce defeat of an anti-government plot.

The government announcement blamed the invasion attempt squarely on Generalissimo Rafael Trujillo, strong man of the Dominican Republic.

"The capture of this Trujillo

airplane brings to a close this chapter of an international conspiracy and of the counter-revolutionary interests in which the jackal Trujillo had an active part," the government announcement said. "This will be demonstrated by our prime minister tonight before the television cameras."

The government announcement broke five days of silence on the fighting in the mountains of central Cuba. The government silence had begun slowing down Cuban business.

Faubus Threatens National Guard Call

LITTLE ROCK, Ark. (AP) — Orval E. Faubus today said he is ready to call on the state police and National Guard.

Faubus Thursday night was accused by Mrs. Daisy Bates, state president of the National Association for the Advancement of Colored People, with using the state police to try to intimidate the NAACP forces.

Mrs. Bates sent a telegram to President Eisenhower saying her pleas for protection had been ignored by local authorities and that friends who had guarded her had been arrested.

Faubus did not say under what circumstances he would

FLIVVER OF THE FUTURE

This two-seat wingless combination light plane and helicopter — the Umbaugh 18 — will be produced by the Fairchild Engine and Airplane Co. at

Hagerstown, Pa. Jaunty-looking craft has three-bladed rotor overhead, like a copter, and pusher-type propeller behind the cabin. (AP Wirephoto.)

Oh, they cut down th' ol' Pinetree — at least, some w'd like t'.

On that missile job, this'll be one time catchin' a fly means a home run.

Sure seems t' be a lot o' revolvin' Cubans.

Lions' Fans Have Hopes For Playoffs

Bombers Ramble in Second Half To Hand B.C. 42-20 WIFU Defeat

(By Canadian Press)

Football eyes shift to Regina tonight for the second struggle of the Western Interprovincial Football Union season. A thriller opened the season Thursday night in Vancouver as Winnipeg Blue Bombers thumped British Columbia Lions 42-20.

The second game puts Saskatchewan Roughriders, who have absorbed two exhibition beatings this week, against Calgary Stampeders.

The Grey Cup champion Bombers were favored to beat Lions and though coach Wayne Robinson's coast crew made a strong bid in the first half, it couldn't contain the powerful Winnipeg club.

Bombers rushed for 326 yards to B.C.'s 129 and right-handed quarterback Jim Van Pelt, a cast on his left wrist, tossed three touchdown passes and went over for a TD himself.

SCORE NOT INDICATIVE

The game was closer than the score indicated and 29,425 fans, who have never seen Lions beat Bombers since B.C. entered the WIFU in 1954, went home with hopes their club might make the playoffs.

End-Frank-Gilliam and half-back Leo Lewis each counted two touchdowns for Bombers. Van Pelt and fullback Charlie Shepard had one each. Van Pelt also kicked a field goal and Shepard added a single on

GRID SUMMARY

WINNIPEG 42, B.C. 20

First Quarter

1. B.C. field goal (Kristopaitis) 7.39.

2. Winnipeg, field goal (Van Pelt) 14.12.

Second Quarter

3. Winnipeg, touchdown (Shepard) 6.04.

4. B.C. touchdown (Veret) 3.37.

5. B.C. convert (Kristopaitis) 7.20.

6. Winnipeg, touchdown (Van Pelt) 7.20.

7. Winnipeg, convert (Shannon) 7.20.

8. B.C. field goal (Kristopaitis) 13.29.

Third Quarter

9. Winnipeg, touchdown (Van Pelt) 8.30.

10. B.C. touchdown (Lofstrom) 8.42.

11. B.C. convert (Kristopaitis) 8.42.

12. Winnipeg, touchdown (Gilliam) 8.42.

13. Winnipeg, convert (Shannon) 8.42.

14. Winnipeg, touchdown (Lewis) 8.42.

15. Winnipeg, touchdown (Gilliam) 8.42.

THE SCOREBOARD

BY
Harry Grayson

NEW YORK—If Luis Aparicio and Nelson Fox are not carrying the White Sox, they at least give the Singles Wonders a fine running start.

Aparicio walks and steals second. Nellie Fox singles and the Singles Wonders have the one run by which they have won nearly half their games.

If the Singles Wonders win Chicago's first American League pennant in 40 years in the old-fashioned way, with excellent pitching and a stout defence and without much showmanship of the long ball, Aparicio and Fox will join the ranks of all-time great double-play combinations. Aparicio and Fox have stood out for three years, but the halfplayer does not become a man of distinction until put in the showcase that is the World Series.

Fox, 31, was a gift from the Athletics. Aparicio, now only 25, was discovered by Luman Harris, then a Chisox coach, while he was managing Caracas in the Venezuelan Winter League.

Aparicio, who stands five-eight and weighs no more than 157 pounds, now is recognized as the slickest fielding shortstop of all-time by renowned authorities headed by Casey Stengel.

"I've seen a lot of them, starting with Honus Wagner at the tag end of his career," says the venerable manager of the Yankees, "but this here kid is the best."

Ap-par-each-ee-oh has sure hands, a strong, accurate arm and prairie-wind speed," says Al Lopez, who came to the Singles Wonders with the youngster and was delighted with him from the start. "Giving Ap-par-each-ee-oh a tremendous advantage in the field and on the bases is the fact that he is in high speed with his first step. This and his extraordinary anticipation and skill accounts for the fact that he individually has stolen more bases than any club.

Ap-par-each-ee-oh does everything better than any other shortstop I have ever seen and he's a stickup clutch hitter and shrewd judge of the strike zone, batting .275."

Making Aparicio all the more amazing is that the soft-spoken lad from Maracaibo performs his feats of legerdemain in these days and nights of the jackrabbit ball, when it is hit to either side of him with the speed of a bullet. Aparicio has a wider range in all directions than any other shortstop, has no peer at coming in on slow rollers or going out for short flies.

After all, he was raised to be a shortstop. His father was one before him and he modeled himself after the countryman he succeeded, Chico Carrasquel.

For some reason that passed on with him, Connie Mack of the then Philadelphia Athletics gave up on Fox before he was 22 and after signing him at 16. When young Foxie was put on the waiver list and the Senators moved to claim him, Mack told his old friend, Clark Griffith, that he was wasting his money.

So the White Sox obtained Foxie on Oct. 19, 1949, for an obscure catcher named Joe Tipton, and haven't been out of the first division in eight years, nor worse than second the last two.

Ap-par-each-ee-oh and Foxie, they make the White Sox.

Put 'em in the World Series and lyrics will be written about them.

BRING ON THE MCC

Exchanging information that might be useful in Sunday's match against touring Marylebone Cricket Club are Rob Wilson (left) and Jack Sparks, who oppose visitors with Victoria and District Cricket Association All-Stars. Wilson, a former Cambridge University star, played against MCC in England, while Sparks was member of Victoria team which met touring MCC side here in 1951. Sunday's match at Beacon Hill starts at 11.15. Stumps will be drawn at 6.30. (Times Photo by Bill Halkett.)

DIGGING INTO THE PAST

Museum Offers Word of Caution To Private Artifact Collectors

MONTE
ROBERTS

Some of my best friends are people...

Friend Jack Dalby was over here from (excuse the expression) Vancouver the other weekend... with his friend Ted Booth... and while here they gathered unto their bosoms friend Wally Courtney... all three friends are employees of the well-known airline which operates unprofitable flights daily across the Gulf... so how did Dalby & Co. arrive?... in a 16-foot Fiberglas outboard... and when Dalby & Co. returned to you should excuse the expression-Vancouver, it was in the 16-footer and on the same day the Washington State Ferries' king-size Kalakala passed up the Port Angeles-Victoria run because the wind and seas were too nasty... Dalby should stick to Hi-Fi...

And while we're on the subject of small boats, friend Miles Smeaton has had published a book about his two attempts to 'round Cape Horn in the yacht *Tau Hang*... (more of this in an upcoming Times book review) friends of Miles and wife Beryl and friend John Guzwell and my special friend, the Siamese cat Pwe will be glad to know they didn't drown... they didn't make it, either... and they have convinced me I would be glad to round the Horn anytime in a small boat, say one about the size of the Queen Elizabeth... mind you, I would insist on wearing my life-jacket and snorkel at all times...

Imagine my next letter from friend Archie Moore will be marked "postage due"... Archie put so many stamps on *Yvon Durelle*, how could he have any left over?... Glad to see friend Bill (Trent) Frayne writing about friend Jack (Butch) Wells in the current issue of *Maclean's*... but sad to note Bill didn't record the deathless moment of Wells' wedding reception (held in Winnipeg's Cave cabaret) when he, the bridegroom, gave a rendition of "Sam, you made the pants too long..." and proved it.

Still enjoying the two-week-old television interview between friends Jim Coleman and Max Baer... when Max assessed the respective fighting abilities of (quote) Peterson and Johnson... which brings to mind the time Van, the surviving partner of Van and Schenck, was doing a single at a Toronto supper club... a sudden heckler was taking dead aim at Van until a large figure loomed up from his table in the background and said: "You got something to say?"... suddenly, the heckler ran out of words... the large figure was owned by friend Buddy, Max's younger but bigger brother...

But for sheer fire when the chips are down, you should meet Thomas Cuff, the local operator for Canadian Press, who weighs in at 98 pounds when his dander is up... when Tommy is cross, you have a storm in a T. Cuff.

Some of my best friends ARE people.

TOPICS OF THE DAY

New Victoria Cougar hockey coach Hal Laycoe will be guest speaker at next Monday's noon luncheon of Victoria Gyro Club at the Empress Hotel.

A film on the Deas Island Tunnel will be shown at next Tuesday's meeting of the Kiwanis Club of Victoria North to be held in the Monterey Restaurant at 6:15 p.m.

Some 365 air cadets from British Columbia, the Yukon and other provinces of Canada are now attending the last of four two-week cadet camps at RCAF Station Sea Island.

The cadets, ranging in age from 14 to 18, are supervised by their own squadron officers under Wing Commander J. S. Niven of No. 1 Wing, Vancouver.

A total of \$133,995 was paid out to jobless people in Victoria during the month of July, the Unemployment Insurance Commission announced here today.

For the whole of the Pacific region, the sum of \$1,516,670 was paid out in benefits. This was \$307,330 less than the amount paid out during the previous month.

The RCN Band of HMCS Naden conducted by Commissioned Officer W. J. Gordon, LRAM, will give a concert in Gorge Park next Sunday at 3 p.m.

The program will include the march "Bond of Friendship," the overture "French Comedy," Beethoven's Pastoral symphony, a selection from Oklahoma and a trumpet solo, "Bugler's Holiday."

The 5th Independent Medium Battery, Royal Regiment of Canadian Artillery, will commemorate the 20th anniversary of the mobilization of the 5th (B.C.) Coast Brigade in the Bay Street Armory on Wednesday, Aug. 26.

The brigade was one of two units in Canada to be mobilized Aug. 26, 1939—16 days before Canada declared war on Germany. The other unit was an east coast artillery regiment.

Former members of the 5th, wishing to attend the anniversary are asked to contact the 5th Brigade orderly room before noon on Aug. 24.

A team of professional and amateur archaeologists is carrying out a scientific "dig" in the Shoal Bay area at Oak Bay, in an attempt to learn secrets of 300 or even 5,000 years ago, by studying relics buried by time. The "dig" is under direction of the Provincial Museum. Progress reports appear daily in The Times.

By WILSON DUFF
Curator of Anthropology,
Provincial Museum

Thursday was the second day of the Provincial Museum's archaeological "dig" in the midden on McNeill Bay. Summer assistants John Sendeay and Richard Cox spent the day extending the first trench, while volunteer Edith Cross and I made a start on Trench B. The artifact count is still quite low, about 20. Perhaps in a couple of days we may begin to discern some patterns in our finds.

One of the kinds of food remains we save in the "associated materials" bag for each level is fish bones, and we have noticed that these are abundant in the midden. Last night at supper time as I con-

Duff tentedly surveyed the fish bones on the side of my plate and mentally compared them with the ones from the midden. I felt a curious kind of kinship with the prehistoric Indians. John and Richard had set out lines from the rocks and caught three cod. Mine was delicious. I wonder how those others tasted, hundreds of years ago?

Dos and Don'ts

Perhaps the publicity on our dig has given others the idea of digging too. This may be a good time for some words of caution to would-be archaeologists.

If your aim is to find specimens for your collection, don't dig for them. There is an easier and better way to get them. Besides, your digging will destroy much valuable information.

Waste of Time

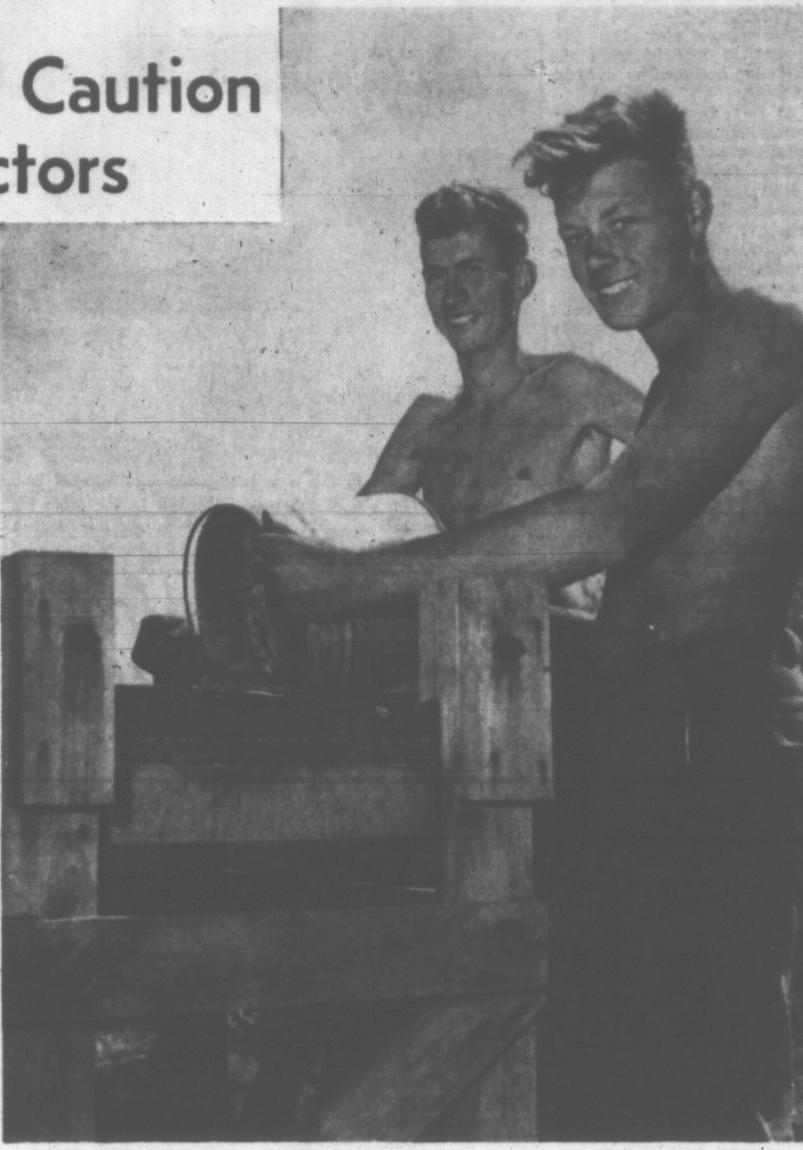

Digging is not nearly as rewarding as many people think, and for nice-looking "showcase" specimens, it is practically a waste of time. The artifacts we find during excavation are usually fragments which would be discarded, if in fact they were recognized as artifacts, by most collectors.

The great majority of the beautiful and showy specimens in collections have been surface finds or have been turned up by accident.

For example, out of the hundred or more of the finest prehistoric stone sculptures of B.C. described in my recent book, "Prehistoric Stone Sculpture of the Fraser Valley and Gulf of Georgia," only one or two were found in excavations.

Sharp-eyed collectors can

perform a very important service by paying frequent visits to such places and col-

YOUNG ARTIFACT ENTHUSIASTS working at museum during school holidays are members of Shoal Bay

archeological team: Left, John Sendeay, 17, 3251 Linwood, and Richard Cox, 16, 772 Victoria. (Times Photo.)

the collectors of vandalism and the destruction of irreplaceable archaeological remains. In some places special legislation has been introduced to control the excavation of archaeological resources.

Fortunately this conflict need not arise in our area. Collectors have an important role to play in discovering sites and making surface collections. All along our coastline are hundreds of middens which have been eroded away by tidal action. These exposed shell banks are excellent collecting localities. Other sites are constantly being revealed by plowing, house and road building.

Sharp-eyed collectors can perform a very important service by paying frequent visits to such places and col-

lecting the artifacts which have come to light. This method is much more rewarding to the amateur than digging.

Tell Us 'Quick'

What should you do if you happen to find archaeological specimens? You should report them to us, and unless you are a serious collector, turn them over to a competent museum for proper care and

storage. You should keep adequate written notes about all of your specimens.

You should make your collection available for study to museum and university archaeologists. Even though it remains in your possession there is no reason why it should not be used.

Finally, you should make provision for your collection when it leaves your personal care, for one reason or another. After all, if it is a good collection, it will likely come into a museum some day. We won't hurry you. We are willing to wait.

\$2 Million Plans Drawn To Modernize Airport

Plans for a \$2,000,000 modernization of Patricia Bay Airport have been drawn up into a department of transport brief according to a Thursday report.

Disclosure of the plans was attributed to Defence Minister George Pearkes. No official announcement has been made by Transport Minister George Hees. (Efforts to contact the two ministers for confirmation were unsuccessful.)

The report said longer runways and a new terminal are planned but no mention was made of relocating the Patricia Bay Highway.

This was one of the stumbling blocks Mr. Pearkes blamed for more than two years' delay since he announced runways would be

extended last winter and a new terminal constructed this summer.

The highway has to be relocated to enable extension of the main east-west runway from 5,000 to the 7,000 feet necessary for propeller-turbine aircraft like the Viscount Trans-Canada Airlines plans to use here in 1961.

CO-OPERATION

Highways Minister P. A. Gagliardi last year said the province would co-operate in relocating the highway but would not pay for the work.

"It is an unheard-of thing to ask us to build it (the highway diversion). They'll have to do the job," Mr. Gagliardi maintained at the time.

Technical work for a reloc-

ation has been completed but formal request for diversion of the highway has been received by the provincial highways department.

The modernization plans call for expenditure of \$1,400,000 on runway extension and taxi strip improvement; \$350,000 on the first stage of a proposed \$1,000,000 air terminal; \$103,000 on improving operational facilities.

ALLOCATION

There was no indication whether the money has been allocated yet by the federal government, but the report said part of the work was to be done this year.

Major Percy Scurrah, who criticized Ottawa earlier this week for repeated delays of the project, said:

"There is no question in my mind that this is it. They did have reasons for the delays but I have no doubt that the work will be done."

He said he was "very pleased" with the report because "it is a recognition that Patricia Bay Airport is very important."

"We have been working on this for two years and we hope we have had some effect but I'm sure it was Mr. Pearkes who put it through," he added.

Chamber of Commerce president Conway Parrott, who was a member of a delegation that visited Ottawa 18 months ago to seek runway extensions, said he hoped modernization of the airport would lead to "some transcontinental flights originating and others terminating at Victoria."

DEATH OF 5-YEAR-OLD

Saanich Firemen Express Sorrow to Boy's Parents

Members of the Saanich Firefighters' Union visited the parents of five-year-old Donald Stewart Thursday at their home, 3314 Fircrest, to express sympathy in the death of the boy, caused by a flailing fire hose.

"We are in deep sorrow, and shaken up gravely by the matter," Deputy Chief Glen Robbins said today. "We have never had an accident like this before in the department's history."

The boy died after being thrown against rocks Wednesday by a fire hose that snapped while being unreeled.

Dr. E. C. Hart, coroner, held an inquiry today and found the death accidental.

"It was unpredictable. There is no way to prevent a five-year-old from following a fire engine. They always do," said Dr. Hart.

Funeral will be held from McCall's Saturday at 1:30 p.m.

Writ Asks Injunction On Market

Legal Action Launched To Prevent Demolition

Legal action to stop demolition of the public market building was opened today.

A Supreme Court writ applying for an injunction, a declaration that the demolition bylaw is invalid and unstated damages was served on City Hall by barrister P. J. Sinnott.

It came only hours before city council was scheduled to give final passage to a bylaw awarding a \$6,400 contract to Farmer Construction for demolition of the 67-year-old building.

Aldermen still could give final reading to the bylaw, clearing the way for a start next week on demolition, but there was no advance indication of which course they would take.

Co-plaintiffs named in the writ were Attilio Randy, Saanich truck farmer who has led opposition to the demolition, and Robert John Williamson, 210 St. Andrews, a city ratepayer.

CLAIM STATEMENT

"A statement of claim will be filed at a later date," Mr. Sinnott said. "When, I don't know. It can't be filed during August because it is part of the legal vacation."

"So I don't know when a trial can be held."

The two plaintiffs seek the declaration that the bylaw is invalid on the grounds that it "misrepresents the situation," Mr. Sinnott said.

He added that Mr. Randy seeks unstated damages on the grounds that he was not given sufficient notice by the city of the termination of his lease or licence as a stallholder.

THREE READINGS

Council has given three readings to the demolition bylaw on the grounds that the building is unsafe. Mr. Randy, in an effort to rally support for his campaign to retain the building, slept in the building for two nights last week after stalls were moved out.

If council decides to go ahead with demolition, Mr. Sinnott said he did not know whether his client would seek an interim injunction to stall any wrecking work until a trial is held.

"We would have to consider our course of action then," he said.

ONLY ONE CASE

B.C. Polio Record Excellent

British Columbia has had only one case of poliomyelitis this year and no deaths, compared with a mounting number of cases and deaths throughout the rest of Canada, particularly Quebec.

The single case here was reported in Vancouver in June and the low rate was explained by provincial health authorities today as due to a low-cycle year and the widespread Salk vaccine immunization program.

It is estimated 95 per cent of B.C. youngsters under 18 have been immunized and about 60 per cent of adults under 40.

Ottawa health authorities said 15 persons, five from Quebec, had died of polio from Jan. 1 to Aug. 8, and on the week ending Aug. 8, 87 new cases were reported, 75 in Quebec.

The figures are expected to show a further substantial increase for the week ending Saturday.

ASK The TIMES

Q. How many areas make up the USSR? F.S.

A. Fifteen republics, comprising an area of 8,585,000 square miles.

Q. How did John D. Rockefeller get his fortune? L.S.

A. From oil. He built the Standard Oil Co. before his death in 1937.

Anyone wishing a question answered is invited to send it to The Times, addressed to "Ask The Times." Editor, Questions and answers will be published daily.

All questions will be read with interest and the best ones will be answered.

The Times does not undertake to solve all questions. It is not a place to sell stamps, coins, or antiques. These should be submitted to dealers.

VICTORIA, B.C., FRIDAY, AUGUST 14, 1959—28 PAGES

PRICE: 10 CENTS SATURDAY, 14 CENTS

NEW BID TO END IWA STRIKE

FINAL BULLETINS

U.S. Leads in Seigniory Tennis

SEIGNIORY CLUB, Que. (CP)—United States players took an early lead today in singles and doubles matches at the annual Seigniory International tennis championships sponsored by the U.S. and Canadian Lawn Tennis Associations for players over 44.

In the doubles Herbert A. Baron of Hasbrouck Heights, N.J., and Harold Melitzer of Jersey City, N.J., defeated Hank Bryant of Vancouver, and Lance Damant of Montreal, 62, 6-1.

Nfld. Forest Fires 'Worse Than Ever'

ST. JOHN'S, Nfld. (CP)—The forest fire situation today was worse than ever. All the fires which sprang up during the last month are again out of control and sweeping the countryside. The forests have been hot and dry for the last week.

Deputy Resources Minister Murray was flying to Labrador today to attempt an assessment of the fire situation. He is expected to recommend what added aircraft, equipment and personnel should be put in the areas.

Matsqui Police Chief Resigns

MATSQUI, B.C. (CP)—Joseph Phillips, chief of the Matsqui police force for 2½ years, has submitted his resignation at the request of the police commission.

No reasons were given for the police commission's request other than that it was "for the good of the force."

Krishnan Beats Laver—Jolts Aussies

BROOKLINE, Mass. (AP)—India's Ramanathan Krishnan stunned favored Australia by beating Wimbledon runner-up Rod Laver 6-1, 6-4, 8-10, 6-4, today in the opening singles match of the Davis Cup inter-zone finals. The victory gave India a 1-0 lead in the best-of-five series.

Faubus Threatens National Guard Call

LITTLE ROCK, Ark. (AP)—Authorities and that friends—Orval E. Faubus today said he is ready to call on the state police and Arkansas National Guard in the school integration situation if necessary.

Faubus' announcement came as three Negro students entered Hall High School peacefully for the third day of token integration in two of Little Rock's four public high schools.

Faubus did not say under what circumstances he would call on the state police and National Guard.

Faubus Thursday night was accused by Mrs. Daisy Bates, state president of the National Association for the Advancement of Colored People, with using the state police to try to intimidate the NAACP forces.

Mrs. Bates sent a telegram to President Eisenhower saying her pleas for protection had been ignored by local

UBC DEVELOPMENT FUND STANDS AT \$9 MILLION

VANCOUVER (CP)—The president of the University of B.C. said today that within the next year the university should be able to more than meet the provincial government's offer to match contributions up to \$10,000,000 for UBC development.

Dr. Norman MacKenzie, in his annual report, said the University Development Fund campaign in 1957 and 1958 was an "overwhelming success," and the fund now stands at more than \$9,000,000.

Reappraise NORAD Share U.K. Times Urges Canada

See Page 25

LONDON (CP)—The Times says Canada ought to reappraise her share in the air defence of North America to avoid "an agonizing conflict" between the continental and Atlantic interests.

The independent newspaper, commenting on United States requests for improvement in radar coverage of the Pine Tree line, says air defence is "a touchy subject" in Canada since American unwillingness to buy the Avro Arrow aircraft resulted in its manufac-

ture being stopped by the Canadian government.

"But the trouble goes deeper than this," The Times editorial continues. "Canada has always clung to her Commonwealth and European associations—she keeps a brigade group and an air division in Germany at great cost—as a counterbalance to the inevitable pressures on her from the United States."

The American idea of air defence is that cities, industry and populations must all be actively protected as well as the deterrent bases. To many

Aerial Game Of 'Catch' For Capsule

VANDENBERG AIR FORCE BASE, Calif. (AP)—A fantastic game of catch was scheduled this afternoon thousands of feet above the Pacific Ocean if all goes well with satellite Discoverer V.

The object: To snare the satellite's ejected 300-pound nose capsule.

CONTRACTS TO AVRO, CANADAIR

OTTAWA (UPI)—A. V. Roe Company will build the engine and Canadian Company will build the airframes for the \$420,000,000 order of Lockheed F104G Starfighter jet planes for the Canadian NATO air division in Western Europe, Defence Production Minister Raymond O'Hurley announced today.

★ ★ ★

OTTAWA (CP)—Prime Minister Diefenbaker told reporters today after a cabinet meeting he had no further news on the question of whether Canada would invite Soviet Premier Khrushchev to visit this country in conjunction with his forthcoming tour of the United States.

He also said he had no information about a prospective cabinet shuffle. He indicated there would be nothing on this until at least next week.

As Discoverer V makes its 16th pass, a tracking station in Alaska will trigger the ejection mechanism. On the next pass the satellite, its position altered by compressed-gas jets, will tilt 60 degrees downward.

At the designated moment, explosive springs and bolts will separate the capsule from its vehicle.

Then the capsule will be slowed by a retro-rocket. A switch operated by forces of deceleration will release a parachute.

Guided by radio signals from the descending capsule, the Flying Boxcar will move in upon it in staircase formation. Trapeze apparatus suspended from the rear of the C-119s will be used in an attempt to grab the parachute, which then would be reeled into the aircraft.

The planes have about 10 minutes to make a catch.

If the planes fail, two military vessels will attempt to pluck the capsule from the sea.

Scientists want to check its instruments for information that can be used in the forthcoming Project Mercury, intended to send man into space and bring him back.

When the capsule ejects from the second-stage rocket its vehicle will continue orbiting. The satellite's life is expected to be about 10 days, the air force says.

Judge Philip made his ruling after an hour of argument by Crown Attorney Harry Deiman and Mrs. Whyte's counsel, B. H. B. Bowley.

The judge said at the conclusion of a 2½-hour hearing there was sufficient evidence to show the home was overcrowded and understaffed.

Mrs. Whyte was in the courtroom for the verdict, but showed no emotion. Only minutes before the decision was announced, she told reporters:

"We're going ahead and we'll build a new Whytehaven regardless of the court's decision."

The 107 children were taken from her mission, about two weeks ago in a raid by welfare department workers.

HAMPTON, Ont. (CP)—Mrs. Bertha (Mom) Whyte officially went out of business today when Judge W. R. Philip ruled that 107 children had been neglected in her unlicensed home at Bowmanville, Ont.

Judge Philip made his ruling after an hour of argument by Crown Attorney Harry Deiman and Mrs. Whyte's counsel, B. H. B. Bowley.

The judge said at the conclusion of a 2½-hour hearing there was sufficient evidence to show the home was overcrowded and understaffed.

"We're going ahead and we'll build a new Whytehaven regardless of the court's decision."

The 107 children were taken from her mission, about two weeks ago in a raid by welfare department workers.

LONDON (Reuters)—The final formal stage in Britain's biggest newspaper deal since the war was concluded in London today in under four minutes.

Less than 20 holders of the stock in Lord Kemsley's newspaper group were present at the meeting at which it was agreed that Canadian publisher Roy Thomson should take over the group for \$15,000,000.

Low—Kimberley 39

AKLAVIK, N.W.T. (CP)—A helicopter with three aboard crashed today in Rat Pass between Fort McPherson, N.W.T., and Old Crow, Y.T.

Two persons were brought to hospital at this post 1,200 miles northwest of Edmonton.

No details were available of the crash at Rat Pass in the Richardson Mountains.

OL' VIC SAYS:

On, they cut down th' of Pinetree—at least, some w'd like it.

On that missile job, this'll be one time catchin' a fly means a home run.

Sure seems t' be a lot o' revolvin' Cubans.

CANADA'S QUEEN

Edging out Victoria's Vivian Petersen, who placed second, 19-year-old Rosemary Keenan of Fredericton, N.B., was crowned Miss Canada at Burlington, Ont., Thursday night. (See story Page 2.)

BANKS CLAMP DOWN

Business Boom Tightens Loans

OTTAWA (CP)—Canada's latest economic boom appears to be threatening to bust out of its monetary britches.

★ ★ ★

CONSUMER CREDIT THREAT?

OTTAWA (CP)—Finance Minister Fleming said today the move by the chartered banks to curtail loans may have the effect of reducing consumer credit.

"I trust it will not put a

brake on economic expansion," he told reporters following a cabinet meeting. "I trust it will not be used to deny needed credit to producers."

Mr. Fleming said the chartered banks "have taken this step on their own responsibility having regard to the extraordinarily heavy demands for commercial credit."

ISLAND DIGEST

Victoria Daily Times FRIDAY, AUG. 14, 1959 11

Cowichan Fair Ground Opens

Ceremony Marks Milestone for Exhibition First Held by Farmers in 1868

(From Duncan Bureau)

Deputy Agriculture Minister William MacGillivray, Victoria, cut the white ribbon across the entrance to the newly-constructed administration building Thursday at 3 p.m. to open the new eight-acre Cowichan Exhibition fair grounds at Duncan.

Stanley Owens, president of the Cowichan Agricultural Society, handed the scissors to Mr. MacGillivray to perform the ceremony.

The deputy mentioned the long history of the exhibition, beginning with the first fair held when the farmers of the Cowichan Valley collaborated with the farmers of Salt Spring Island in 1868.

Two cheques were presented to exhibition president Archie Stevenson. Ald. John Kerrone gave \$4,000 from the city of Duncan, and Mr. MacGillivray presented a cheque for \$5,000, second of three government grants for that amount.

Coun. Don Morton of the municipality of North Cowichan was master of ceremonies.

RE-ESTABLISHED

Mr. Stevenson thanked the federal and provincial governments, heads of civic, social, and business organizations, and social and service clubs, who had helped re-establish the exhibition.

"The fair is a development we owe to the youth of our community," Mr. Stevenson said.

Many dignitaries were present, including Maj. Gen. C. A. P. Murison, reeve of North Cowichan; Mayor J. T. Dobson, Duncan; David H. Owen, son.

Fresh orange peels were found near the wreckage.

Firefighters had to rely on water pumped from small waterholes far down the mountain, and relayed to the blaze.

GANGES — A forest fire which broke out early Tuesday morning on Mount Tuam, at the southern end of Salt Spring Island, was blamed on souvenir hunters examining the wreckage of an air force plane which crashed Jan. 4, 1944.

D. D. Clarke, Lands End Road, on the North Saanich peninsula, saw the blaze at 3:30 a.m. and notified L. H. Lorentzen, ranger here. It was controlled shortly, and was kept under guard for the next 24 hours.

Take your elegance straight this fall . . . in a wand-sleender coat that's

sheer beauty in fabric and line. ALPACAMA — a symphonic blend of

mohair and wool — stresses warmth without weight, durability without

stiffness, luxuriance without high cost. The colors, too (black, hazel-

nut, parrot, mountain berry, fern moss, pecan, bahama, king fisher,

cognac, cardinal), are tuned to the all-over accent on elegance that will

set you apart when you step out toged in ALPACAMA!

Hudson's Bay Company.

INCORPORATED 27TH MAY 1670.

• Dist. EV 51211

AIR CADET Flt. Sgt. Paul Wilson, Cumberland, met Queen Mother Elizabeth and Princess Anne at Sandringham while touring United Kingdom with 24 Canadian air cadets. Island youth's visit is part of program of exchange between cadets of Canada and six other nations.

Duncan Cow Top Producer

(From Duncan Bureau)

DUNCAN — Don Morton, Duncan, is the owner of the leading Ayrshire producing cow in the country in the class for animals of 10 years and over, according to the Ayrshire Breeders' Association of Canada.

Haugland Bessie gave 11,569 pounds of milk and 537 pounds of butterfat in 305 days, beginning her last lactation at 11½ years. She now has a lifetime production of 105,375 pounds of milk and 4,318 pounds of butterfat in nine lactations, and has been awarded a gold seal certificate. She has been type classified as "excellent."

ENTRIES

DEL MAR

FIRST RACE—Six furlongs:

Khaidi (E. Burns)

Speed Plan (R. Campas)

Belair (R. Yaks)

Sahara (D. Pierce)

Little Apache (R. Campas)

Kimsey (G. Lanoway)

Buka Banooka (Mundorf)
